

# HPE OFFICECONNECT 1950 SWITCH SERIES

## Fixed Port Web Managed Ethernet Switches

### WHAT'S NEW

- Flexible 10GbE connections-10GBASE-T copper and SFP+ fiber-in an affordable, smart web-managed switch series.
- Four-high stacking can simplify network administration and add resiliency.
- Power over Ethernet models supporting up to 370 Watts total PoE+/PoE power.
- Customized operation using intuitive Web browser-based interface
- Limited lifetime warranty for unit, power,

### OVERVIEW

The HPE 1950 Switch Series is a family of smart web-managed Gigabit switches with 10GbE uplinks for small business customers needing advanced high-performance connections. The series has 2 standard and 2 PoE+ models, 24- and 48-GbE ports, each with 2 10GBASE-T and 2 10G SFP+ high-bandwidth ports.

True stacking of as many as 4 devices allows them to be logically administered as a single entity. The switches support Layer 3 static routing on IPv4 and IPv6. Other advanced features include ACLs, 802.1X, STP, RSTP, and MSTP. Limited

---

and fans.

lifetime warranty covers unit, fans and power supplies.

## FEATURES

### **High-level Gigabit with 10GbE Networking for Advanced Small Businesses.**

Each model of the HPE 1950 Switch Series includes four 10GbE connections to connect to servers, network storage devices, or to other switches.

Two connections of 10GBASE-T deliver 10GbE over copper Category 6a cabling for simple, affordable, high-bandwidth connections to a maximum distance of 100 meters.

Two SFP+ ports allow for fiber connectivity at various distances, at 1/10GbE speeds, using optional SFP+ 10GbE or SFP Gigabit transceivers.

Aggregate 10GbE connections for even higher bandwidth using Link Aggregation Control Protocol.

### **Simplified Network Administration**

Logically group or "stack" as many as four units of the HPE 1950 Switch Series and manage this as a single entity, greatly simplifying network administration. Interconnect stacked units using 10GbE connections, with as much as 40GbE total stacking bandwidth connecting the units.

Use the intuitive web-browser based interface to configure and administer these smart-managed devices.

These devices support SNMP versions 1, 2c and 3, allowing administration of these devices from a remote SNMP-based management platform.

Network Time Protocol facilitates timekeeping across your network so time-based actions and trouble-shooting logs are kept synchronized.

Units will automatically retrieve an IP Address from a DHCP server, allowing for near plug-and-play deployments.

### **Robust Security to Protect Your Network**

The HPE 1950 Switch Series lets you use Virtual LANs and access control lists to set bounds on what data can be seen by which users.

Leverage 802.1X with a RADIUS server to ensure only known and authorized users can access your network.

Multiple features guard your network from user or server spoofing and from malicious network-based attacks.

Help secure management traffic using supported SSL/HTTPS encryption and SNMPv3 capabilities.

### **Resiliency Features to Keep Your Network Running**

The HPE 1950 Switch Series supports Spanning Tree Protocol, Rapid Spanning Tree Protocol, and Multiple Spanning Tree Protocol standards for creating hot-standby recovery links.

Distribute important links across multiple units in a logical stack for added resiliency. Units can even be in different buildings and still be logically stacked.

Devices support two independent primary and secondary operating system flash images for backup and recovery during unit upgrades.

Power over Ethernet (PoE) models can be paired with an optional Redundant Power System which can maintain power even if the unit's power supply fails, as well as supplement available PoE power up to 780 Watts.

## Technical specifications

## HPE OfficeConnect 1950 Switch Series

<b>Differentiator</b>	HPE 1950 Switches are smart web-managed Gigabit Ethernet switches with 10G Gigabit uplinks, 4 total, 2 each SFP+ and copper 10GBASE-T. They support Layer 3 static routing, 4 high stacking, 802.1X login, ACLs. Standard and PoE+ models.
<b>Ports</b>	Model dependent: 28-port models have (24) 10/100/1000 ports plus (2) fixed GE/10G SFP+ and (2) GE/10GBase-T ports. 52-port models have (48) 10/100/1000 ports plus (2) fixed GE/10G SFP+ and (2) GE/10GBase-T ports. Two models with PoE+. Console port on all units.
<b>Latency</b>	100 Mb Latency: < 5 $\mu$ s 1000 Mb Latency: < 5 $\mu$ s 10 Gbps Latency: < 1.5 $\mu$ s
<b>Throughput</b>	Model dependent: 28-port models 95.2 Mpps, 52-port models 130.9 Mpps.
<b>Routing/switching capacity</b>	Model dependent: 28-port models 128 Gbps, 52-port models 176 Gbps.
<b>PoE capability</b>	Both PoE+ models support 370 Watt PoE/PoE+ power budget. For 48-Port PoE+ model, optional RPS for up to 780 Watt PoE/PoE+ power budget.
<b>Stacking capabilities</b>	Four-high resilient stacking using dual 10GbE ports (copper or fiber) 40 Gbps total stacking bandwidth.
<b>Management features</b>	IMC - Intelligent Management Center Limited command-line interface Web browser SNMP manager HTTPS RMON1 FTP Supported by HPE IMC and generic SNMP management platforms. Refer to documentation for MIB support details.
<b>Input voltage</b>	100-240 VAC
<b>Operating humidity range</b>	10 to 90% (noncondensing)

Most, if not all IT organizations are on a digital transformation journey — each at a different stage. With over 11,000 IT projects conducted and 1.4 million customer interactions each year, [HPE Pointnext Services](#)' 15,000+ experts and its vast ecosystem of solution partners and channel partners are uniquely able to help you at every stage of your digital transformation. We bring together technology and expertise to help you drive your business forward and prepare for whatever is next.

Advisory and Professional Services help you accelerate your digital transformation. [Operational Services](#) help you remove complexity and respond rapidly to business demands.

### **Operational Services from HPE Pointnext Services**

[HPE Pointnext Tech Care](#) provides fast access to product-specific experts, an AI-driven digital experience, and general technical guidance to help enable constant innovation. We have reimagined IT support from the ground up to deliver faster answers and greater value. By continuously searching for better ways to do things—as opposed to just fixing things that break—HPE Pointnext Tech Care helps you focus on achieving your business goals.

- **[HPE Datacenter Care](#)** helps modernize and simplify IT operations. Partner with an assigned account team, access technical expertise, an enhanced call experience gives you priority access, choose hardware and software support, implement proactive monitoring to help stay ahead of issues, and access HPE IT best practices and IP.
- **[HPE Proactive Care](#)** offers an enhanced call experience and helps reduce problems with personalized proactive reports and advice. This also includes collaborative software support for Independent Software Vendors (ISVs), (Red Hat, VMWare, Microsoft, etc.). [Read more](#)
- **[HPE Foundation Care](#)** helps when there is a problem and has a choice of response levels. Collaborative software support is included and provides troubleshooting help for ISVs running on your server. [Read more](#).

### **Other related services**

**[Defective Media Retention](#)** is optional and applies only to Disk or eligible SSD/Flash Drives replaced by HPE due to malfunction.

**[HPE Service Credits](#)** offers a menu of technical services, access additional resources, and specialist skills.

**[HPE Education Services](#)** delivers a comprehensive range of services to support your people as they expand their skills required for a digital transformation.

Consult your HPE Sales Representative or Authorized Channel Partner of choice for any additional questions and support options.
