Shape the Future of QuickSpecs - Your Input Matters

HPE ProLiant Compute DL320 Gen12

QuickSpecs

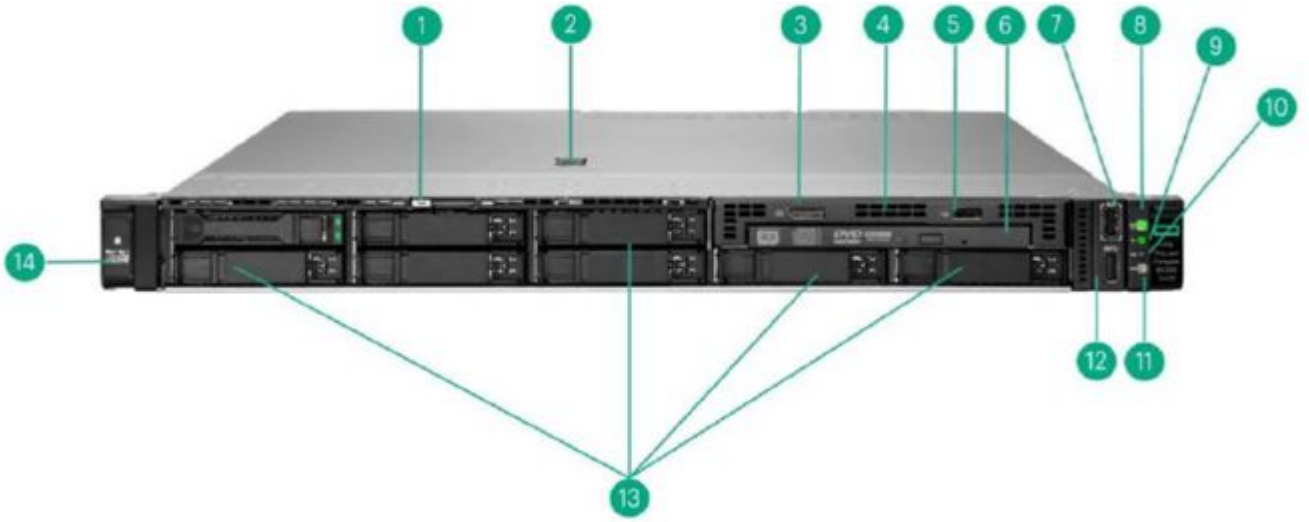
Based on industry-standard modular server design, the HPE ProLiant Compute DL320 Gen12 provides a right-sized, efficient compute solution.

It is a 1U 1P server that provides best-in-class performance, with maximum I/O capabilities for cloud-native, Infrastructure-as-a-Service (IaaS), and general-purpose workloads while consuming considerably less energy than 2P systems.

HPE ProLiant Compute DL320 Gen12

The HPE ProLiant Compute DL320 Gen12 is purpose-built for edge computing, delivering exceptional performance and optimized economics and is an excellent choice for both virtualized and containerized workloads.
The HPE ProLiant Compute DL320 Gen12 is powered Intel® Xeon® 6 Processors with up to 144 cores - including Intel® Rich I/O options, increased memory capability (up to 4 TB 6400 MT/s), and high-speed PCIe Gen5. It supports up to four single-wide GPUs (or two double-wide) with front or rear-facing I/O, and capacity for up to 20 EDSFF drives. The HPE ProLiant Gen12 servers are engineered to optimize IT at the edge with a cloud operating experience, built-in security, and optimized performance for workloads to drive your business forward.

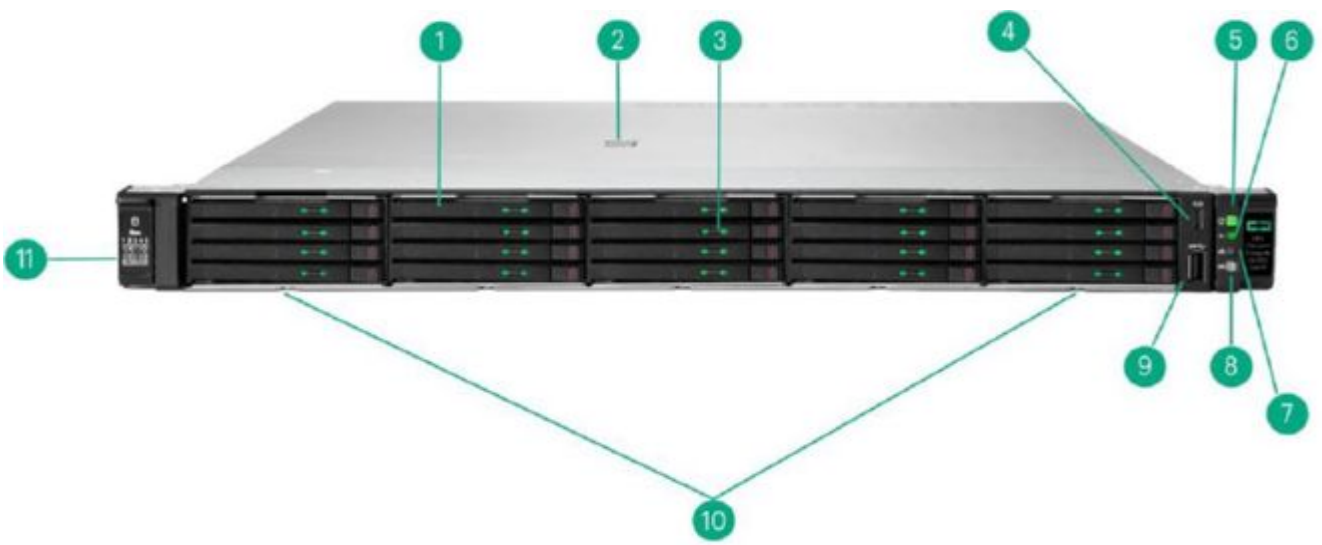
Overview



SFF Front View with optional Universal Media Bay, optical Drive, DisplayPort, USB 2.0

Item	Description	Item	Description
1.	Quick removal access panel	9.	Health LED
2.	Serial number/iLO information pull tab	10.	NIC Status [1]
3.	DisplayPort (optional - shown)	11.	Unit ID Button/LED
4.	Universal Media Bay (optional):	12.	USB 3.2 Gen1 port
	– Option 1: Optical drive bay + DisplayPort & USB 2.0 port kit (shown)	13.	Drive bays; backplanes options
	– Option 2: 2 SFF x4 Tri-Mode 24G U.3 BC Drive Cage		– Option 1: 8SFF x1 Tri-Mode 24G U.3 BC Backplane
5.	USB 2.0 port (optional - shown)		– Option 2: 8SFF x4 Tri-Mode 24G U.3 BC Backplane
6.	Optical Drive (optional- shown)		
7.	iLO Service Port	14.	Drive support label
8.	Power On / Standby button and system power LED		

Notes: [1] Front NIC LED display does not support NIC LED ACT/LINK indication from OCP NICs

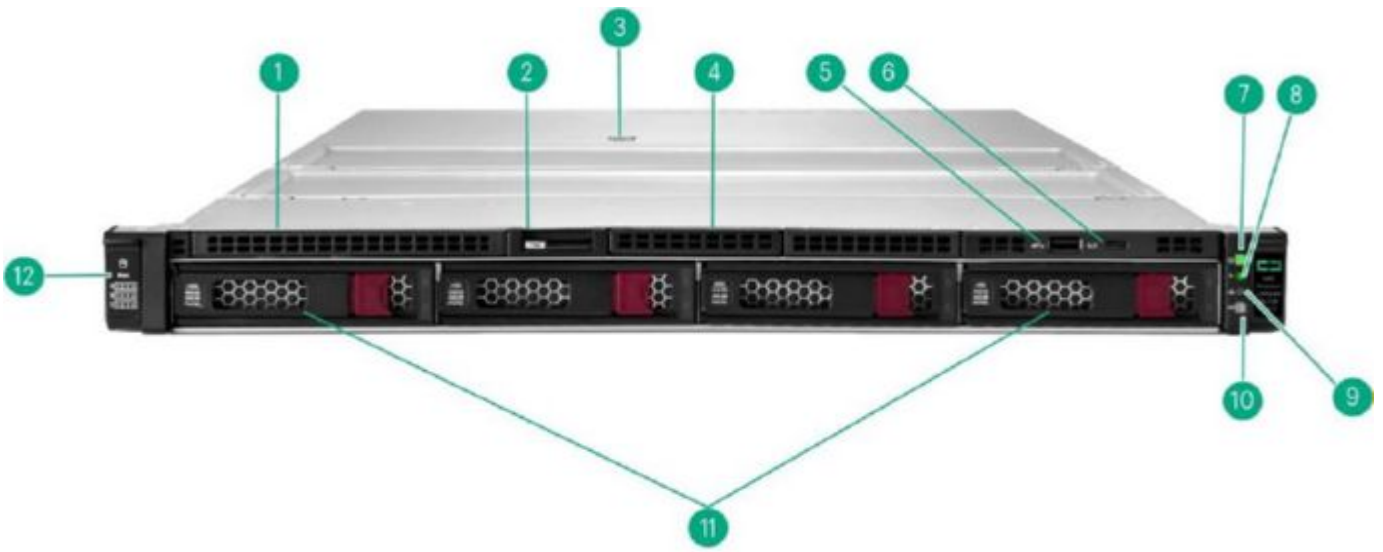


Overview

SFF/EDSFF Front View - 20 EDSFF Drives shown

Item	Description	Item	Description
1.	Serial number/iLO information pull tab	6.	Health LED
2.	Quick Removal Access Panel	7.	NIC Status
3.	Drive Cage 3: (EDSFF shown)	8.	UID Button/LED
	– Option 1: 2x Front OCP 3.0 – Option 2: NS204i Hot-Plug Boot Device	9.	USB 3.2 Gen1 port
4.	iLO Service Port	10.	Drive Cage 1-5: (EDSFF Shown)
5.	Power On / Standby Button and LED		– Option 1: 4x EDSFF per cage – Option 2 : 2x 2SFF per cage – Option 3: Blank
		11.	Drive Cage Information label

Notes: [1] Front NIC LED display does not support NIC LED ACT/LINK indication from OCP NICs

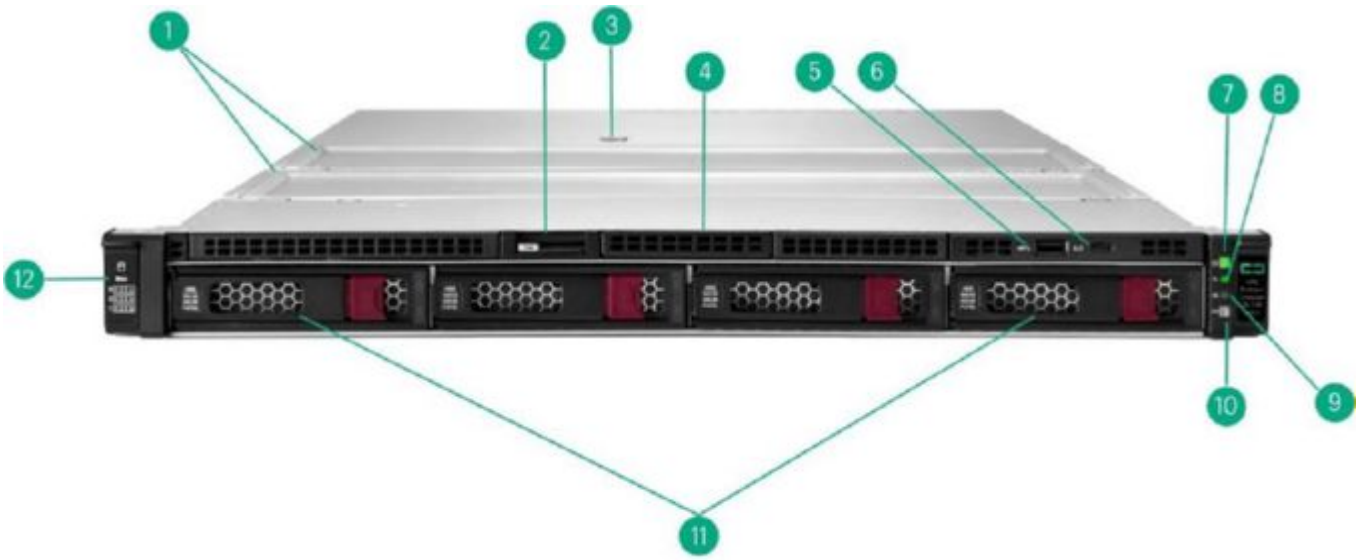


4 LFF Front View - 4 LFF drives shown

Item	Description	Item	Description
1.	Optical Drive Bay (optional - not shown)	7.	Power On / Standby button and system power LED
2.	Serial number/iLO information pull tab	8.	Health LED
3.	Quick removal access panel	9.	NIC Status[1]
4.	Optional DisplayPort & USB 2.0 port bundle kit	10.	UID Button/LED
5	USB 3.2 Gen1 port	11.	SAS/SATA drive bays (shown, populated)
6.	iLO Service Port	12.	Drive Support label

Notes: [1] Front NIC LED display does not support NIC LED ACT/LINK indication from OCP NICs

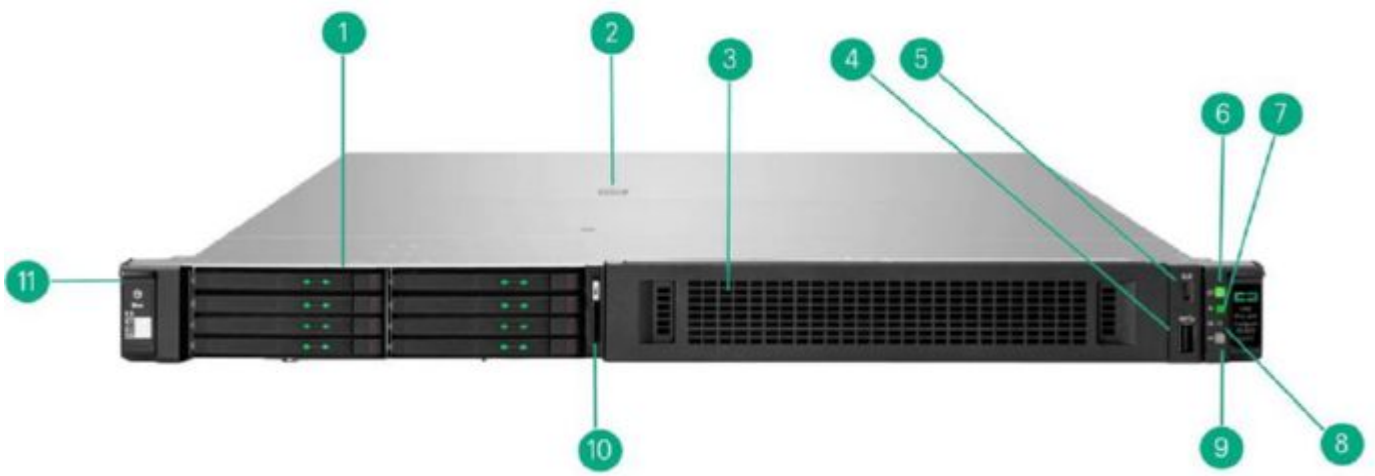
Overview



12 LFF Front View - 12 LFF + SAS drives shown

Item	Description	Item	Description
1.	Drive cage 2 & 3 access points	7.	Power On / Standby button and system power LED
2.	Serial number/iLO information pull tab	8.	Health LED
3.	Quick removal access panel	9.	NIC Status[1]
4.	Optional DisplayPort & USB 2.0 port bundle kit	10.	UID Button/LED
5	USB 3.2 Gen1 port.	11.	SAS/SATA drive bays (shown, populated)
6.	iLO Service Port	12.	Drive Support label

Notes: [1] Front NIC LED display does not support NIC LED ACT/LINK indication from OCP NICs



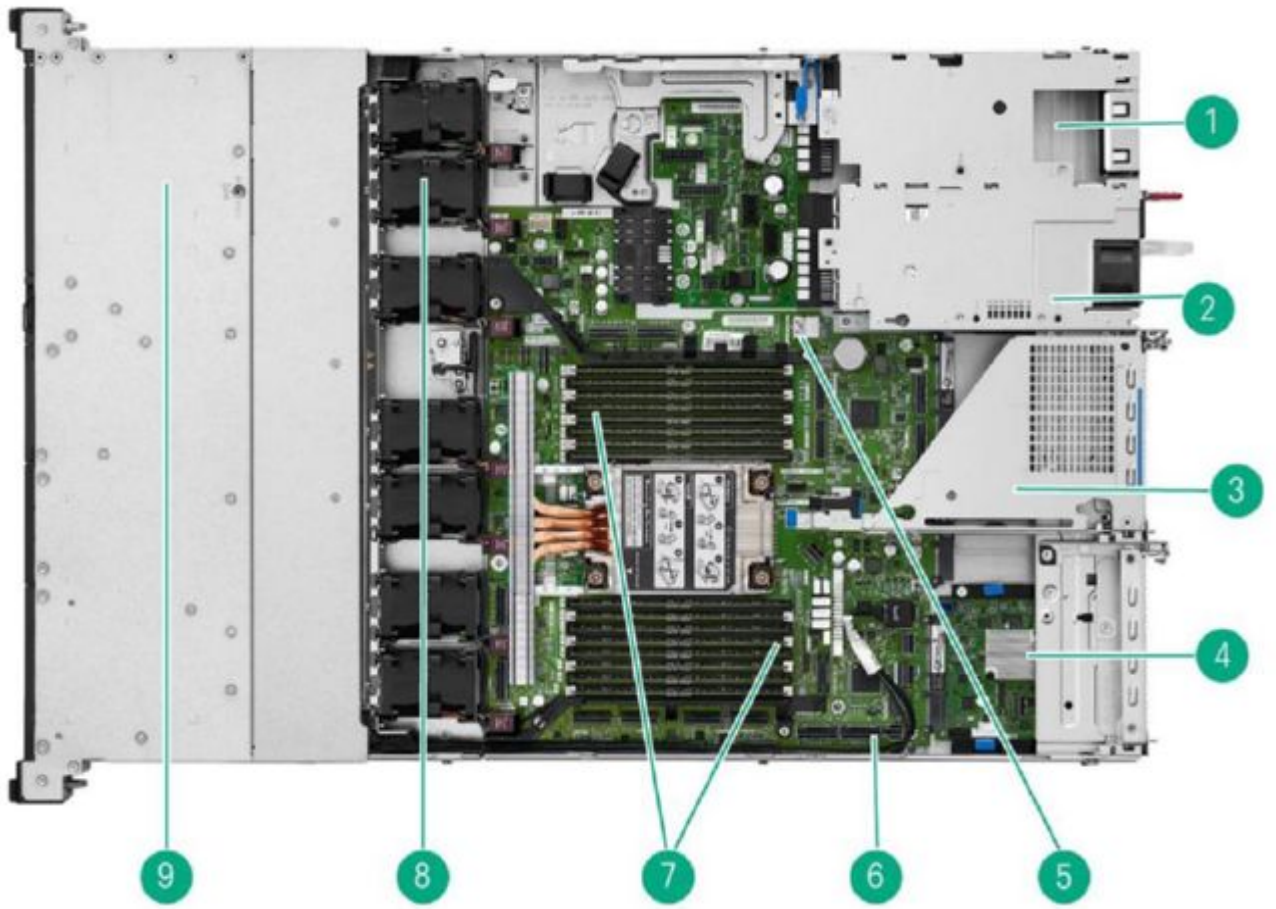
Front View - GPU CTO Server

Item	Description	Item	Description
1.	Two (2) Stacking Drive Cages	6.	UID Button/LED Power On / Standby button and LED
	– Option1: 2x 4EDSFF Drive Cage (shown)	7.	Health LED

Overview

	– Option2: 2x 2SFF Drive Cage	8.	NIC Status
2.	Quick removal access panel	9.	UID Button/LED
3	GPU Cage (PCIe Slots 3-6 shown, covered). Supports 2x DW GPU or 4x SW GPU.	10.	Serial number/iLO information pull tab
4.	USB 3.2 Gen1 port	11.	Drive cage information label
5.	iLO Service Port		

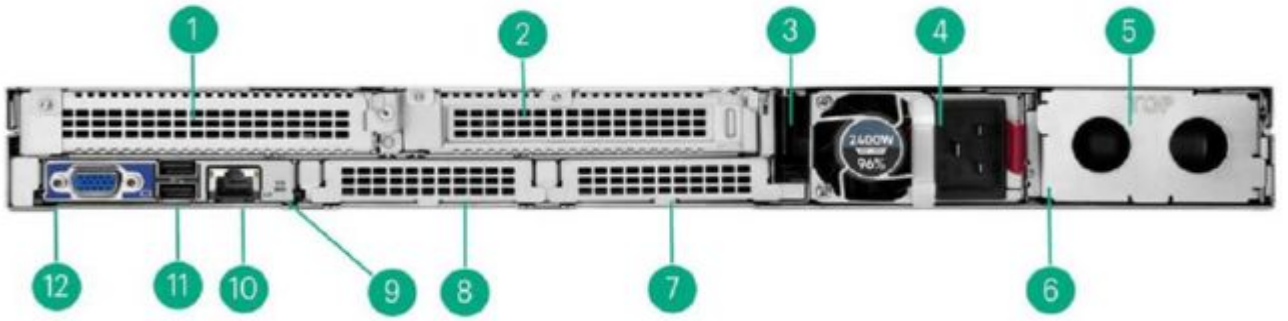
Notes: [1] Front NIC LED display does not support NIC LED ACT/LINK indication from OCP NICs



Internal View - Standard for all DL320 Gen12

Item	Description	Item	Description
1.	PSU Blank	6.	DIMM Slots
2.	PSU	7.	System Fans (7)
3	Secondary Riser	8.	Drive Bays
4	DC-SCM Module	9.	USB 3.0 port
5.	Primary Riser Slot		

Overview



Rear View - Standard for all DL320 Gen12

Item	Description	Item	Description
1.	PCIe Slot1 (Primary Riser, optional)	7.	Slot 21 OCP 3.0 Slot B (optional), shown covered
2.	PCIe Slot2 (Secondary Riser, optional)	8.	Slot 20 OCP 3.0 Slot A, shown covered
3.	NS204i-u Boot Device (Optional - not shown)	9.	UID Indicator LED on DC SCM
4.	60mm Power Supply Slot 2	10.	Dedicated iLO network port on DC SCM
5.	60mm Power Supply Slot 1 (unpopulated)	11.	Two (2) USB 3.2 ports on DC SCM
6.	Serial port location (optional - not shown)	12.	Video (VGA) port on DC SCM

What's New

- All-new DL320 Gen12 server
- Intel® Xeon® 6 Processors with Rich I/O options
- Data Center - Modular Hardware System (DC-MHS) design
- Modular - Common Redundant Power Supply (M-CRPS) design
- OCP 3.0 (Front or Rear)
- NS204i-u front or rear install option based on configuration
- DDR5 6400 MT/s memory
- iLO7 on DC-SCM module

Platform Information

Form Factor

- 1U rack

Chassis Types

- SFF Server (P71437-B21) supports 8SFF drives (standard) and 10 SFF with optional:

- 8+2 SFF cage.
- Optical Drive Tray with Optical Drive, DisplayPort, USB 2.0
- System Insight Display

Overview

– SFF/EDSFF Server(P75217-B21) supports up to 10 SFF or 20 EDSFF drives with optional:

- Media Bay containing Optical Drive, DisplayPort, USB 2.0
- 2 Front OCP3.0 slots or hot-plug M.2 boot device

– 4 LFF Server (P75218-B21) with optional:

- Optical Drive

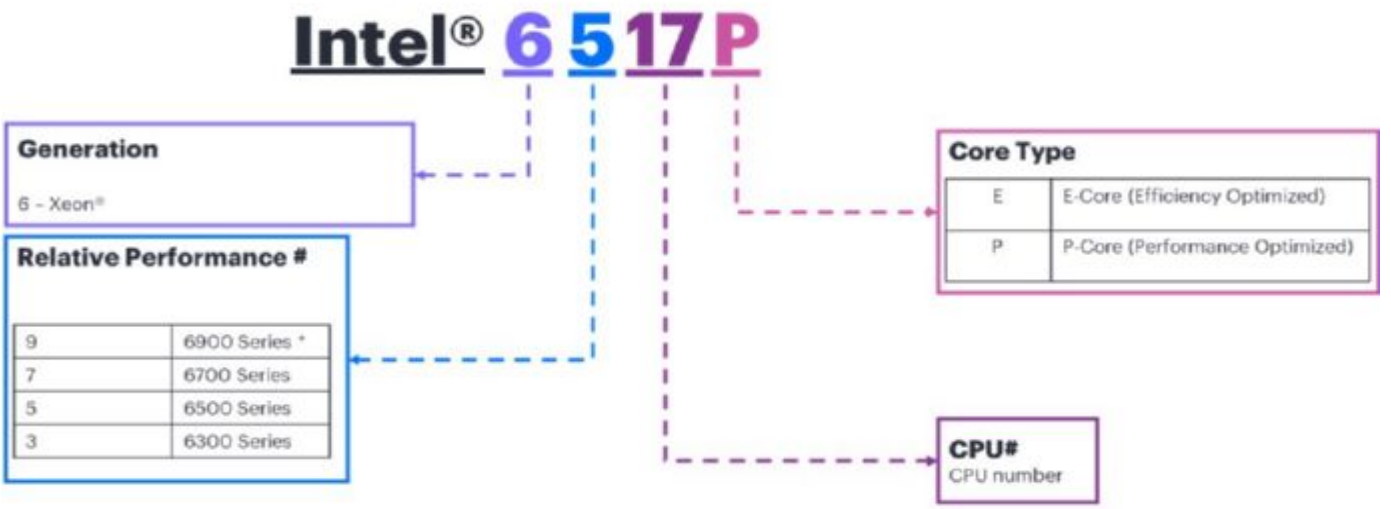
– 12 LFF Server (P75219-B21)
– GPU Server (P75220-B21) supports up to two DW or 4 SW GPUs with optional:

- SFF and EDSFF drive options

System Fans (7 fans required)
– HPE ProLiant Compute Gen12 1U Standard Fan Kit, includes one fan.
– HPE ProLiant Compute Gen12 1U High Performance Fan Kit, includes one fan.
– HPE ProLiant Compute DL320 Gen12 1U Closed-loop Liquid Cooling FIO Fan Kit, includes one fan.

Notes:
– High-Performance fan kits are required when >185W Processor SKUs, High-Performance NVMe drives, or certain backplanes are populated. See notes under each option category or each individual option for specifics.
– Closed-loop Liquid Cooling FIO Fan Kit required for > 270W Processor SKUs.
– Seven (7) fan kits are required for all CTO server models.

Processors



Intel® Xeon® 6 processor naming convention

* CPU Series not supported on HPE ProLiant Compute Gen12 platforms.

For more information regarding Intel® Xeon® 6 processors, refer to the following https://www.intel.com/content/www/us/en/now/xeon-6.html.

The DL320 Gen12 platform supports Intel® Xeon® 6 Efficient Core (E-Core) and Performance-Core (P-Core) processors. The below processors are supported on the DL320 Gen12 platform. Select one of the processors below.

Intel® Xeon 6® Efficient-Core (E-Core) Performance per Watt Processors								
Intel® Xeon® Models	Base Speed (GHz)	Cores	L3 Cache (MB)	Power (W)	UPI Links	DDR5 (MT/s)	SGX Enclave Size (GB)	Die
6710E	2.4	64	96	205	4	5600	512	HDCC
6731E	2.2	96	96	250	0	5600	512	HDCC
6740E	2.4	96	96	250	4	6400	512	HDCC
6746E	2	112	96	250	4	5600	512	HDCC
6756E	1.8	128	96	225	4	6400	512	HDCC
6766E	1.9	144	108	250	4	6400	512	HDCC

Intel® Xeon 6® Efficient-Core (E-Core) Performance Processor								
6780E	2.2	144	108	330	4	6400	512	HDCC

Standard Features

Intel® Xeon 6® Performance-Core (P-Core) Processors								
Intel® Xeon® Models	Base Speed (GHz)	Cores	L3 Cache (MB)	Power (W)	UPI Links	DDR5 (MT/s) *	SGX Enclave Size (GB)	Die**
6507P	3.5	8	48	150	4	6400	512	LCC
6517P	3.2	16	72	190	4	6400	512	LCC
6527P	3.0	24	144	255	4	6400	512	HCC
6730P	2.5	32	288	250	4	6400	512	XCC
6736P	2.0	36	144	205	4	6400	512	HCC
6737P	2.9	32	144	270	4	6400	512	HCC
6747P	2.7	48	288	330	4	6400	512	XCC
6767P	2.4	64	336	350	4	6400	512	XCC
6787P	2.0	86	336	350	4	6400	512	XCC

Notes:
– ** Intel® HCC & LCC die processors have delayed availability.
– * DDR5 MT/s is 6400 MT/s @ 1 DIMMs per channel (DPC) and 5200 MT/S @ 2DPC

Intel® Xeon 6® Mainline Processors								
Intel® Xeon® Models	Base Speed (GHz)	Cores	L3 Cache (MB)	Power (W)	UPI Links	DDR5 (MT/s) *	SGX Enclave Size (GB)	Die**
6505P	2.2	12	48	150	4	6400	128	LCC
6515P	2.4	16	72	150	4	6400	128	LCC
6520P	2.4	24	144	210	4	6400	128	HCC
6730P	2.3	32	144	225	4	6400	128	HCC
6740P	2.1	48	288	270	4	6400	128	XCC
6760P	2.2	64	320	330	4	6400	128	XCC

Notes:
– ** Intel® HCC & LCC die processors have delayed availability.
– * DDR5 MT/s is 6400 MT/s @ 1 DIMMs per channel (DPC) and 5200 MT/S @ 2DPC

Intel® Xeon 6® Single Socket Processors								
Intel® Xeon® Models	Base Speed (GHz)	Cores	L3 Cache (MB)	Power (W)	UPI Links	DDR5 (MT/s) *	SGX Enclave Size (GB)	Die**
6511P	2.5	16	72	150	0	6400	128	LCC
6521P	2.6	24	144	225	0	6400	128	HCC
6731P	2.5	32	144	245	0	6400	128	HCC
6741P	2.5	48	288	300	0	6400	128	XCC
6761P	2.5	64	336	350	0	6400	128	XCC
6781P	2.0	80	336	350	0	6400	128	XCC

Notes:
– ** Intel® HCC & LCC die processors have delayed availability.
– * DDR5 MT/s is 6400 MT/s @ 1 DIMMs per channel (DPC) and 5200 MT/S @ 2DPC

System Management Chipset

HPE iLO 7 ASIC on DC-SCM Module required, included.
Notes: Refer to the iLO QuickSpecs.

Standard Features

Memory	
Type	HPE DDR5 Smart Memory Registered (RDIMM)
DIMM Slots Available	16 DIMM Slots, 8 channels, 2 DIMMs per channel
Maximum capacity (RDIMM)	4 TB 16 x 256 GB RDIMM 6400 MT/s @ 1DPC and 5200 MT/s @ 2DPC

Notes:
All processors listed support up to 4 TB memory.
– The maximum memory speed is limited by the processor selection.
– To realize the performance memory capabilities listed in this document, HPE DDR5 Smart Memory is required.
For additional information, please visit the HPE Memory QuickSpecs and Technical White Papers or HPE DDR5 Smart Memory QuickSpecs.

Memory Protection Features

Advanced ECC
Advanced ECC uses device data correction to detect and correct single-bit and all multibit errors within a single DRAM chip.
Adaptive Double DRAM Device Correction (ADDDC)
Advanced Double DRAM Device Correction enables the server to dynamically map out a failing DRAM device. Enabling it can have some impact to system performance under certain workloads. This is set to enabled by default.

Network Controller

The HPE ProLiant Compute DL320 Gen12 server does not include a network controller but offers the customer a variety of networking options listed in the Core Options section.

PCIe Expansion Slots

Expansion Slots #	Technology	Bus Width	Connector Width	Slot Form Factor
1 (Primary Riser)	PCIe 5.0	x16	x16	FHHL
2 (Secondary Riser)	PCIe 5.0	x16	x16	FHHL

OCP Expansion Slots

Expansion Slots #	Technology	Bus Width	Connector Width
1 Rear OCP A (OCP 3.0) embedded 1 Rear OCP B (OCP 3.0) optional 2 Front (OCP3.0) optional (one w/NCSI)	PCIe 5.0	x16	x16

Standard Features

Internal Storage Devices

- Optical Drive - Available on SFF, SFF/EDSFF and LFF CTO Servers as an option (DVD-ROM or DVD-RW)
- Drives - None shipped standard

Graphics

Integrated Video Standard

- VGA port on DC-SCM module
- DisplayPort with optional optical disk drive
- Video modes up to 1920 x 1200@60Hz (32 bpp)
- 16MB Video Memory

Maximum Storage

Chassis	Drive Type	Drive Capacity	Total Storage
HPE DL320 Gen12 SFF CTO Server	SFF SAS HDD	2.4 TB	24 TB (10x2.4 TB)
HPE DL320 Gen12 SFF CTO Server	SFF SATA SSD	3.84 TB	38.4 TB (10x3.84 TB)
HPE DL320 Gen12 SFF CTO Server	SFF SAS SSD	15.36 TB	153.6 TB (10x15.36 TB)
HPE DL320 Gen12 SFF/EDSFF CTO Server	SFF NVMe	15.36 TB	153.6 TB (10x15.36 TB)
HPE DL320 Gen12 SFF/EDSFF CTO Server	EDSFF NVMe	15.36 TB	307.2 TB (20x15.36 TB)
HPE DL320 Gen12 4LFF CTO Server	LFF HDD	24 TB	288 TB (4x24 TB)
HPE DL320 Gen12 12LFF CTO Server	LFF HDD	24 TB	288 TB (12x24 TB)
HPE DL320 Gen12 GPU CTO Server SFF Drive Cage	SFF SATA SSD	3.84 TB	15.36 TB (4x3.84 TB)
HPE DL320 Gen12 GPU CTO Server SFF Drive Cage	SFF SAS SSD	15.36 TB	61.44 TB (4x15.36 TB)
HPE DL320 Gen12 GPU CTO Server EDSFF Drive Cage	EDSFF NVMe	15.36 TB	122.88 TB (8x15.36 TB)

Storage Controllers

NVMe Boot Devices

- HPE NS204i-u v2 480GB NVMe Hot Plug Boot Optimized Storage Device

Notes:

- NS204i-u Boot device includes 2x 480GB M.2 NVMe SSDs, with preconfigured hardware RAID1.
- Front Hot Plug, Rear Hot Plug or internal (non-Hot Plug) location options.

Does not occupy a PCIe slot.

For additional details refer to: **HPE OS Boot Device QuickSpecs**

Software RAID Controller

Intel® Virtual RAID on CPU (Intel® VROC)

Notes:

- Supports up to 8 direct attach NVMe bays.
- Intel® VROC NVMe is disabled by default. Requires licensing.
- RAID support - 0/1/5/10, depending on licensing options.
- For additional details refer to: Intel VROC for HPE ProLiant QuickSpecs

Essential RAID Controllers

Standard Features

– HPE MR216i-p Gen11 x16 Lanes without Cache PCI SPDM Plug-in Storage Controller
– HPE MR216i-o Gen11 x16 Lanes without Cache OCP SPDM Storage Controller

Performance RAID Controllers

– HPE MR408i-o Gen11 x8 Lanes 4GB Cache OCP SPDM Storage Controller
– HPE MR416i-o Gen11 x16 Lanes 8GB Cache OCP SPDM Storage Controller
– HPE MR416i-p Gen11 x16 Lanes 8GB Cache PCI SPDM Plug-in Storage Controller

Notes: For additional details, refer to HPE Compute MR Gen11 Controllers QuickSpecs

Power Supply

– HPE 1000W M-CRPS Titanium Hot Plug Power Supply Kit
– HPE 1500W M-CRPS Titanium Hot Plug Power Supply Kit
– HPE 2400W M-CRPS Titanium Hot Plug Power Supply Kit

Notes: All power supplies rated for 96% efficiency. Power supplies ship without power cords. For information on power specifications and technical content, visit HPE Server power supplies.

European Union ErP Lot 9 Regulation

Beginning on January 1st, 2024, units sold into the European Economic Area (EEA), the United Kingdom, Switzerland, or Turkey must include more efficient AC power supplies: 94% for multi-output and 96% for single-output. HPE M-CRPS power supplies are single-output, and part numbers P67240-B21, P67244-B21, P67248-B21, and P67252-B21 are 96% efficient, thus meeting requirements.

Interfaces	
Serial	Optional (rear), requires Serial Enablement Kit.
Video	DC-SCM VGA port (rear) Optional DisplayPort (front)
Network Ports	None standard. Choice of OCP or standup card required.
HPE iLO Remote Mgmt Port	1 GbE Dedicated (rear) on DC-SCM module
Front iLO Service Port	1 standard (USB-C, front)
USB 3.2 Gen1 Ports	4 standard (1 front, 2 rear, 1 internal) Optional, additional USB 2.0 front in 4LFF, SFF, and SFF/EDSFF models.

Operating Systems and Virtualization Software Support for HPE Servers

HPE servers are designed for seamless integration with partner Operating Systems and Virtualization Software. By collaborating closely with our partners, we ensure that their products are optimized, certified, and fully supported within your HPE server environment.

Access the certified and supported servers for each of the OS and Virtualization software: HPE Servers Support & Certification Matrices

HPE Server UEFI

Unified Extensible Firmware Interface (UEFI) is an industry-standard that provides better manageability and more secured configuration than the legacy ROM while interacting with your server at boot time. HPE ProLiant Gen12 servers have a UEFI Class 3 implementation to support UEFI Mode.

Notes: The UEFI System Utilities tool is analogous to the HPE ROM-Based Setup Utility (RBSU) of legacy BIOS. For more information, please visit https://www.hpe.com/support/hpeuefisystemutilities-quicklinks.

Standard Features

UEFI enables numerous new capabilities specific to HPE ProLiant servers, such as:
- Secure Boot and Secure Start enabled for enhanced security.
- Embedded UEFI Shell
- Operating system-specific functionality
- Mass Configuration Deployment Tool using iLO RESTful API that is Redfish API Conformant
- Support for > 2.2 TB (using GPT) boot drives.
- PXE boot support for IPv6 networks
- USB 3.0 Stack
- Workload Profiles for simple performance optimization
- Embedded TPM Support

UEFI Boot Mode only:
- iSCSI Software Initiator Support
- NVMe Boot Support
- HTTP/HTTPs Boot support as a PXE alternative
- Boot support for option cards that only support a UEFI option ROM

Industry Standard Compliance

- ACPI 6.3 Compliant
- Advanced Encryption Standard (AES)
- Active Directory v1.0
- ASHRAE A3/A4

  Notes: For additional technical, thermal details regarding ambient temperature, humidity, and feature support, please visit https://www.hpe.com/support/ASHRAEGen11
- DMTF Systems Management Architecture for Server Hardware Command Line Protocol (SMASH CLP)
- Energy Star
- EU Lot9 Compliant
- IPMI 2.0
- Microsoft® Logo certifications
- PCIe 3.0 Compliant
- PCIe 4.0 Compliant
- PCIe 5.0 Compliant
- PXE Support
- Redfish API
- Secure Digital 4.0
- SMBIOS 3.2
- SNMP v3
- TLS 1.2
- TPM 2.0 Support
- Triple Data Encryption Standard (3DES)
- UEFI (Unified Extensible Firmware Interface Forum) 2.7
- USB 2.0 Compliant
- USB 3.0 Compliant
- VGA Port

Standard Features

Embedded Management

HPE Integrated Lights-Out (HPE iLO)
Monitor your servers for ongoing management, service alerting, reporting, and remote management with HPE iLO.
Learn more at http://www.hpe.com/info/ilo.

UEFI
Configure and boot your servers securely with industry-standard Unified Extensible Firmware Interface (UEFI).
Learn more at https://www.hpe.com/support/hpeuefisystemutilities-quicklinks.

Intelligent Provisioning
Hassle-free server and OS provisioning for one or more servers with Intelligent Provisioning.

Learn more at https://www.hpe.com/support/hpeintelligentprovisioning-quicklinks.

iLO RESTful API
iLO RESTful API is Redfish API conformance and offers simplified server management automation, such as configuration and maintenance tasks based on modern industry standards. Learn more at https://www.hpe.com/support/restfulinterface/docs.

OpenBMC Support
OpenBMC Capable through iLO6 Transfer of Ownership Process.
Learn more at OpenBMC Support

Server Utilities

Active Health System
The HPE Active Health System (AHS) is an essential component of the iLO management portfolio that provides continuous, proactive health monitoring of HPE servers. Learn more at http://www.hpe.com/servers/ahs.

Active Health System Viewer
Use the Active Health System Viewer, a web-based portal, to easily read AHS logs and speed problem resolution with HPE selfrepair recommendations, to learn more visit http://www.hpe.com/servers/ahsv.

Smart Update
Keep your servers up to date with the HPE Smart Update solution by using Smart Update Manager (SUM) to optimize the firmware and driver updates of the Service Pack for ProLiant (SPP).
Learn more at https://www.hpe.com/us/en/servers/smart-update.html.

HPE iLO Mobile Application
Enables the ability to access, deploy, and manage your server anytime from anywhere from select smartphones and mobile devices. For additional information please visit: http://www.hpe.com/info/ilo/mobileapp.

RESTful Interface Tool
RESTful Interface tool (iLOREST) is a single scripting tool to provision using iLO RESTful API to discover and deploy servers at scale. Learn more at http://www.hpe.com/info/resttool.

Scripting Tools
Provision one too many servers, using your scripts to discover and deploy with Scripting Tool (STK) for Windows and Linux or Scripting Tools for Windows PowerShell. Learn more at http://www.hpe.com/servers/powershell.

Standard Features

HPE OneView Standard
HPE OneView is an on-premises, multi-generational server monitoring and management solution. HPE OneView Standard can be used for inventory, health monitoring, alerting, and reporting without additional fees. Customers can upgrade their management experience with an HPE OneView Advanced license, all provided by the same tool. Learn more at http://www.hpe.com/info/oneview.

HPE Compute Ops Management

Transform compute lifecycle management with a cloud experience that delivers greater simplicity, agility, and speed across your entire server environment, wherever it lives. This software-as-a-service tool provides a dashboard with global visibility and intuitive management of server health, security and compliance status to help you easily identify areas that need immediate attention. Users can update tens to thousands of servers faster through intelligent delta-based firmware downloads and on-demand HPE iLO firmware updates.

HPE Compute Ops Management is cloud-native software that is continually updated with new services, features, patches, and firmware packs. The management application resides in HPE GreenLake cloud (access via https://common.cloud.hpe.com) and leverages the HPE GreenLake architecture, security, and unified operations.

A 3-year subscription to HPE Compute Ops Management is added by default when ordering an HPE ProLiant Gen12 rack, tower, or micro server.

For a complete list of software as-a-service subscription SKUs and more information, visit the HPE Compute Ops Management QuickSpecs: https://www.hpe.com/psnow/doc/a50004263enw

For information on supported HPE servers, the complete list can be found here: https://www.hpe.com/info/com-supported-servers

Security

Experience unparalleled security benefits with HPE ProLiant Compute Gen12 servers, designed to enhance your infrastructure's security and performance. These servers come equipped with cutting-edge embedded security features, ensuring robust protection for your critical data and applications. Key features include:

- HPE Integrated Lights-Out (HPE iLO7): This product offers advanced embedded security features for monitoring, service alerting, reporting, and remote management.
- Enhanced Server Data Security: Encryption and key management, iLO Managed Encryption, UEFI-managed encryption, and self-encrypting drives (SED) for enhanced data-at-rest protection.
- Sanitize Data with One-Button Secure Erase: This method complies with NIST SP 800-88 guidelines for media sanitization, ensuring the secure decommissioning of servers.
- Expanded Industry Security Compliance: Adherence to standards such as FIPS 140-3, NIST SP 800-53, NIST SP 800-171, and NIST SP 800-88.
- HPE Compute Ops Management: Provides an intuitive cloud operating experience, ensuring streamlined and highly secure operations from the edge to the cloud.
- Physical Security Options: System maintenance switch, USB security, rack and power security, bezel lock, and chassis intrusion detection switch.
- HPE Trusted Supply Chain: HPE Trusted Supply Chain offers enhanced security and compliance for organizations worldwide. Servers built with this option undergo rigorous inspections and checkpoints to detect and mitigate malicious microcode and counterfeit parts throughout the server build and lifecycle

Please refer to the HPE ProLiant Compute Gen12 Embedded Security QuickSpecs document for more detailed information at

Standard Features

https://www.hpe.com/psnow/doc/a50009218enw

Warranty

This product is covered by a global limited warranty and supported by HPE Services and a worldwide network of Hewlett Packard Enterprise Authorized Channel Partners resellers. Hardware diagnostic support and repair are available for three years from the date of purchase. Support for software and initial setup is available for 90 days from the date of purchase. Enhancements to warranty services are available through HPE Services operational services or customized service agreements. Hard drives have either a one-year or three-year warranty; refer to the specific hard drive QuickSpecs for details.

Notes: Server Warranty includes 3-Year Parts, 3-Year Labor, and 3-Year Onsite support with next business day response. Warranty repairs may be completed using Customer Self Repair (CSR) parts. These parts fall into two categories: 1) Mandatory CSR parts are designed for easy replacement. A travel and labor charge will result when customers decline to replace a Mandatory CSR part; 2) Optional CSR parts are also designed for easy replacement but may involve added complexity. Customers may choose to have Hewlett Packard Enterprise replace Optional CSR parts at no charge. Additional information regarding worldwide limited warranty and technical support is available at:

https://www.hpe.com/support/ProLiantServers-Warranties

Optional Features

Server Management

HPE iLO Advanced

HPE iLO Advanced licenses offer smart remote functionalities for all HPE ProLiant servers without compromise. The license includes the fully integrated remote console, virtual keyboard, video, and mouse (KVM), multi-user collaboration, console record and replay, and GUI-based and scripted virtual media and virtual folders. You can also activate the enhanced security and power management functionality.

HPE OneView Advanced

HPE OneView Advanced offers a sophisticated level of automation to infrastructure management by taking a template-driven approach to provisioning, updating, and integrating compute, storage, and networking infrastructure. It builds upon the base features of HPE OpenView Standard and provides full-featured licenses which can be purchased for managing multiple HPE server generations.

To learn more, visit http://www.hpe.com/info/oneview.

Accelerator and GPU Information

Hewlett Packard Enterprise supports various accelerators on select HPE ProLiant servers to support different workloads. The accelerators enable seamless integration of GPU computing with HPE ProLiant servers for high-performance computing, large data center graphics, deep learning and virtual desktop deployments. These accelerators deliver all the standard benefits of GPU computing while enabling maximum reliability and tight integration with system monitoring and management tools such as HPE Insight Cluster Management Utility.

One Config Simple (OCS/SCE)

OCS/SCE is a guided self-service tool to help sales and non-technical people provide customers with initial configurations in 3 to 5 minutes. You may then send the configuration on for configuration help or use it in your existing ordering processes. If you require "custom" rack configuration or configuration for products not available in SCE, please contact Hewlett Packard Enterprise Customer Business Center or an Authorized Partner for assistance.

https://h22174.www2.hpe.com/SimplifiedConfig/Welcome#

Rack and Power Infrastructure

The story may end with servers, but it starts with the foundation that makes compute go - and business grow. We have reinvented our entire portfolio of rack and power products to make IT infrastructure more secure, practical, and efficient. In other words, we have created a more robust, smarter, and simpler infrastructure to help you get the most out of your IT equipment. As an industry leader, Hewlett Packard Enterprise is uniquely positioned to address the key concerns of power, cooling, cable management, and system access.

Learn more about HPE Racks, KVM, PDUs, and UPSs at HPE Rack and Power Infrastructure.

Service and Support

HPE Services

No matter where you are in your digital transformation journey, you can count on HPE Services to deliver the expertise you need when, where, and how you need it. From planning to deployment, ongoing operations and beyond, our experts can help you realize your digital ambitions.
https://www.hpe.com/services

Consulting Services

No matter where you are on your journey to hybrid cloud, experts can help you map out your next steps. From determining what workloads should live where, to handling governance and compliance, to managing costs, our experts can help you optimize your operations.
https://www.hpe.com/services/consulting

HPE Managed Services

HPE runs your IT operations, providing services that monitor, operate, and optimize your infrastructure and applications, delivered consistently and globally to give you unified control and let you focus on innovation.
HPE Managed Services | HPE

Operational services

Optimize your entire IT environment and drive innovation. Manage day-to-day IT operational tasks while freeing up valuable time and resources. Meet service-level targets and business objectives with features designed to drive better business outcomes.
https://www.hpe.com/services/operational

HPE Complete Care Service

HPE Complete Care Service is a modular, edge-to-cloud IT environment service designed to help optimize your entire IT environment and achieve agreed upon IT outcomes and business goals through a personalized experience. All delivered by an assigned team of HPE Services experts. HPE Complete Care Service provides:

- A complete coverage approach - edge to cloud
- An assigned HPE team
- Modular and fully personalized engagement
- Enhanced Incident Management experience with priority access
- Digitally enabled and AI-driven customer experience

https://www.hpe.com/services/completecare

HPE Tech Care Service

HPE Tech Care Service is the operational support service experience for HPE products. The service goes beyond traditional support by providing access to product specific experts, an AI-driven digital experience, and general technical guidance to not only reduce risk but constantly search for ways to do things better. HPE Tech Care Service delivers a customer-centric, AI-driven, and digitally enabled customer experience to move your business forward. HPE Tech Care Service is available in three response levels. Basic, which provides 9x5 business hour availability and a 2-hour response time. Essential, which provides a 15-minute response time 24x7 for most enterprise level customers, and Critical, which includes a 6-hour repair commitment where available and outage management response for severity 1 incidents.
https://www.hpe.com/services/techcare

HPE Lifecycle Services

HPE Lifecycle Services provide a variety of options to help maintain your HPE systems and solutions at all stages of the product lifecycle. A few popular examples include:

- Lifecycle Install and Startup Services: Various levels for physical installation and power on, remote access setup, installation and startup, and enhanced installation services with the operating system.
- HPE Firmware Update Analysis Service: Recommendations for firmware revision levels for selected HPE products, considering the relevant revision dependencies within your IT environment.
- HPE Firmware Update Implementation Service: Implementation of firmware updates for selected HPE server, storage, and solution products, considering the relevant revision dependencies within your IT environment.
- Implementation assistance services: Highly trained technical service specialists to assist you with a variety of activities, ranging from design, implementation, and platform deployment to consolidation, migration, project management, and onsite technical forums.
- HPE Service Credits: Access to prepaid services for flexibility to choose from a variety of specialized service activities, including assessments, performance maintenance reviews, firmware management, professional services, and operational best practices.

Notes: To review the list of Lifecycle Services available for your product, go to:
https://www.hpe.com/services/lifecycle

For a list of the most frequently purchased services using service credits, see the HPE Service Credits Menu

Other Related Services from HPE Services

HPE Education Services
Training and certification designed for IT and business professionals across all industries. Broad catalogue of course offerings to expand skills and proficiencies in topics ranging from cloud and cybersecurity to AI and DevOps. Create learning paths to expand proficiency in a specific subject. Schedule training in a way that works best for your business with flexible continuous learning options.
https://www.hpe.com/services/training

Defective Media Retention
An option available with HPE Complete Care Service and HPE Tech Care Service and applies only to Disk or eligible SSD/Flash Drives replaced by HPE due to malfunction.

Consult your HPE Sales Representative or Authorized Channel Partner of choice for any additional questions and service options.

Parts and Materials
HPE will provide HPE-supported replacement parts and materials necessary to maintain the covered hardware product in operating condition, including parts and materials for available and recommended engineering improvements.

Parts and components that have reached their maximum supported lifetime and/or the maximum usage limitations as set forth in the manufacturer's operating manual, product QuickSpecs, or the technical product data sheet will not be provided, repaired, or replaced as part of these services.

How to Purchase Services
Services are sold by Hewlett Packard Enterprise and Hewlett Packard Enterprise Authorized Service Partners:

- Services for customers purchasing from HPE or an enterprise reseller are quoted using HPE order configuration tools.
- Customers purchasing from a commercial reseller can find services at https://ssc.hpe.com/portal/site/ssc/

Service and Support

AI Powered and Digitally Enabled Support Experience
Achieve faster time to resolution with access to product-specific resources and expertise through a digital and data driven customer experience.

Sign into the HPE Support Center experience, featuring streamlined self-serve case creation and management capabilities with inline knowledge recommendations. You will also find personalized task alerts and powerful troubleshooting support through an intelligent virtual agent with seamless transition when needed to a live support agent.

Consume IT On Your Terms

HPE GreenLake edge-to-cloud platform brings the cloud experience directly to your apps and data wherever they are-the edge, colocations, or your data center. It delivers cloud services for on-premises IT infrastructure specifically tailored to your most demanding workloads. With a pay-per-use, scalable, point-and-click self-service experience that is managed for you, HPE GreenLake edge-to-cloud platform accelerates digital transformation in a distributed, edge-to-cloud world.

- Get faster time to market
- Save on TCO, align costs to business
- Scale quickly, meet unpredictable demand
- Simplify IT operations across your data centers and clouds

To learn more about HPE Services, please contact your Hewlett Packard Enterprise sales representative or Hewlett Packard Enterprise Authorized Channel Partner. Contact information for a representative in your area can be found at "Contact HPE" https://www.hpe.com/us/en/contact-hpe.html

For more information, please refer to http://www.hpe.com/services

Configuration Information

Smart Templates from HPE

HPE is releasing new Smart Template technology in the One Config Advanced (OCA) configurator. These Templates represent the CTO equivalents of the top-selling BTO configurations. They are intended to provide simple starting points to assist you in easily creating and customizing your desired Server solutions. HPE Servers that have Platform Templates developed by HPE Product Managers will have a separate tab in the HPE OCA configurator.

Workload Solutions Templates from HPE

The Workload Solutions Templates build on the Smart Templates technology to easily develop working configurations of the most compelling Workload Solutions. The templates complement the reference Builds developed by HPE. Workload Solutions templates preconfigure some of the key architecture decisions and make it easier for Sellers to get started and complete a differentiated server solution for your ' 'customer's specific workload.

Mainstream SKUs

HPE launched the Mainstream SKU initiative as a market-driven approach to Demand Steering. It is a simplified portfolio of our top-selling options that meet the current and future market trends. HPE has committed to providing a more predictable and faster experience for these options. Mainstream SKUs enjoy higher safety stock levels and have higher fulfillment service levels than non-Mainstream SKUs. Mainstream orders are fulfilled +30% faster than non-Mainstream orders, have fewer shortages, and have better recovery dates. This platform has Mainstream SKUs in the options portfolio and is eligible for an improved Mainstream experience. Mainstream SKUs are designated with a Mainstream symbol in our configurators.

Mainstream Configurations

HPE is using the new Smart Templates technology to present Mainstream configurations. All the options in a Mainstream configuration are pre-selected Mainstream SKUs to optimize the performance, predictability, and fulfillment experience. Check the Template section in our configurators for eligible Mainstream configurations.

This section lists some of the steps required to configure a Factory Integrated Model. To ensure valid configurations are ordered, Hewlett Packard Enterprise recommends using an HPE-approved configurator. Contact your local sales representative for information on configurable product offerings and requirements.

- Factory Integrated Models must start with a CTO Server.
- FIO indicates that this option is only available as a factory installable option.
- Some options may not be integrated at the factory. Contact your local sales representative for additional information

Notes: This document is not intended to be used as a complete configuration guide. For validated configuration an HPE configuration tool must be used to create a valid configuration.

Step 1: Base Configuration (choose one (1) of the following base models below)

Configuration Information

CTO Server	HPE ProLiant DL32 Gen12 SFF CTO Server	HPE ProLiant DL32 Gen12 SFF/EDSFF CTO Server	HPE ProLiant DL32 Gen12 4 LFF CTO Server	HPE ProLiant DL32 Gen12 12 LFF CTO Server	HPE ProLiant DL32 Gen12 GPU CTO Server
SKU Number	P71437-B21	P75217-B21	P75218-B21	P75219-B21	P75220-B21
TAA SKU[1]	P71437-B21#GTA	P75217-B21#GTA	P75218-B21#GTA	P75219-B21#GTA	P75220-B21#GTA
Processor	Not included as standard				
DIMM Slots	16 DIMM slots				
Storage Controller	Choice of HPE modular Smart Array and PCIe plug-in Controllers, and Intel® VROC RAID on CPU.				
PCIe Slots	PCIe 5.0: 2 slots (x 16 FHHL)				
OCP Slots	1x OCP 3.0 PCIe 5.0 (x16) + 1 optional OCP PCIe (x16)				
Drive Cage - included	8 SFF Drive Cage SAS/SATA/NVMe x1, or x4 based on configuration	None Included	4 SAS/SATA LFF	12 SAS/SATA LFF	None Included
Network Controller	None standard. Choice of OCP 3.0 or PCIe select standup network adapters.				
Fans	Support for (7) Standard, High-Performance, or Closed Loop Cooling Fans				
Management	HPE iLO7 on DC-SCM Module required, included. Features: Intelligent Provisioning (standard), iLO Advanced (optional), and OneView (optional)				
Video	One (1) VGA (rear)				
USB	Front: One (1) USB 3.2 Gen1 + iLO service port Rear: Two (2) USB 3.2 Gen1 ports Internal: One (1) USB 3.2 Gen1 port				
	Option: One (1) Front USB 2.0 port	Option: One (1) Front USB 2.0 port	Option: One (1) Front USB 2.0 port	Option: One (1) Front USB 2.0 port	
Security	Embedded TPM 2.0 (Trusted Platform Module)				
Rail Kit	Optional Easy Install rails and CMA				
Form Factor	1U Rack[2]				
Warranty	3-year parts, 3-year labor, 3-year onsite support with next business day response.				

Notes:

- All DL320 Gen12 CTO Server models require the selection of Processor, Fans, Memory, and Power Supply. Backplane selections available for SFF, SFF/EDSFF and GPU CTO Server.
- [1]HPE offers multiple Trade Agreement Act (TAA) compliant configurations to meet the needs of US Federal Government customers. These products are either manufactured or substantially transformed into a designated country. TAA compliance is only provided when HPE options are included as part of factory integrated orders (CTO).
- [2]12 LFF CTO Server requires 1200mm depth rack for proper mounting.

Configuration Information

Step 2: Choose Core Options

- Choice of 1 Processor model and Heat Sink Kit
  Requires necessary Heat Sink for rated processor wattage.
- Choice of DDR5 memory options.
  Requires necessary Fan Kits for different memory configurations subject to the recommended system ambient temperature.
- Choice of Backplane / Drive cage
- Choice of Riser Cards
- Choice of Storage Controllers, OS Boot Devices and VROC
- Choice of Storage Controller Cables
- Choice of SSD, HDD, and Optical Drives
- Choice of Networking options: PCIe standup or OCP 3.0. May require necessary Fan Kits subject to recommended system ambient temperature.
- Choice of Accelerator options
- Choice of Power and Cooling options

Step 3: Choose Additional Options

- Choice of Security options
- Choice of Optical Drives and Enablement Kits
- Choice of Software as a Service Management - HPE Compute Ops Management and HPE OneView
- Choice of Embedded Management
- Choice of Rail Kits
- Choice of Rack options
- Choice of Support Services

Choice of Core Options

Choose one (1) Processor

Intel® Xeon 6® Efficient-Core (E-Core) Performance per Watt Processors	
Intel® Xeon® 6710E 2.4GHz 64-core 205W Processor for HPE	P71117-B21
Intel® Xeon® 6731E 2.2GHz 96-core 250W Processor for HPE	P71118-B21
Intel® Xeon® 6740E 2.4GHz 96-core 250W Processor for HPE	P71119-B21
Intel® Xeon® 6746E 2.0GHz 112-core 250W Processor for HPE	P71120-B21
Intel® Xeon® 6756E 1.8GHz 128-core 225W Processor for HPE	P71121-B21

Intel® Xeon® 6731P 2.5GHz 32-core 245W Processor for HPE	P74574-B21
Intel® Xeon® 6741P 2.5GHz 48-core 300W Processor for HPE	P73830-B21
Intel® Xeon® 6761P 2.5GHz 64-core 350W Processor for HPE	P73833-B21
Intel® Xeon® 6781P 2.0GHz 80-core 350W Processor for HPE	P73836-B21

Notes:
- Adequate fans and heatsinks must be selected.
- Processors with TDP > 185W require:
  High Performance Heatsink (P71956-B21) and 7x High-Performance Fan Kit (P71958-B21).
- Processors with TDP > 270W require:
  Closed-loop Liquid Cooling FIO Heat Sink Kit (P76605-B21) and 7x Closed-loop Liquid Cooling FIO Fan Kit (P76603-B21).

Choose Memory Options
Please select one or more memory DIMMs from below.

For the new Gen12 memory population rule whitepaper and optimal memory performance guidelines and memory speed table, please go to: http://www.hpe.com/docs/memory-population-rules

For memory Reliability, Accessibility, and Serviceability (RAS) features whitepaper like Fast Fault Tolerance and legacy mirrored memory feature, etc., please click here.

Registered DIMMs DDR5 (RDIMMs)

HPE 16GB (1x16GB) Single Rank x8 DDR5-6400 CAS-52-52-52 EC8 Registered Smart Memory Kit	P69726-B21
HPE 32GB (1x32GB) Dual Rank x8 DDR5-6400 CAS-52-52-52 EC8 Registered Smart Memory Kit	P69727-B21
HPE 64GB (1x64GB) Dual Rank x4 DDR5-6400 CAS-52-52-52 EC8 Registered Smart Memory Kit	P69728-B21
HPE 96GB (1x96GB) Dual Rank x4 DDR5-6400 CAS-52-52-52 EC8 Registered Smart Memory Kit	P69729-B21
HPE 128GB (1x128GB) Dual Rank x4 DDR5-6400 CAS-52-52-52 EC8 Registered Smart Memory Kit	P69730-B21
HPE 256GB (1x256GB) Quad Rank x4 DDR5-6400 CAS-60-52-52 EC8 Registered 3DS Smart Memory Kit	P73447-B21

Notes:
- Total memory selection must be in quantities of 1, 2, 4, 6, 8 or 16. For more detailed information regarding memory population rules, please refer to - https://www.hpe.com/docs/server-memory.
- Certain memory configurations may be restricted in the GPU CTO Server, based on ambient inlet temperature.
- 96 GB and higher DIMMs require high performance fan kits.
- For additional information, refer to the **HPE DDR5 Smart Memory QuickSpecs**
- The maximum memory speed is 6400 MT/S at 1 DPC and 5200 MT/S at 2 DPC.

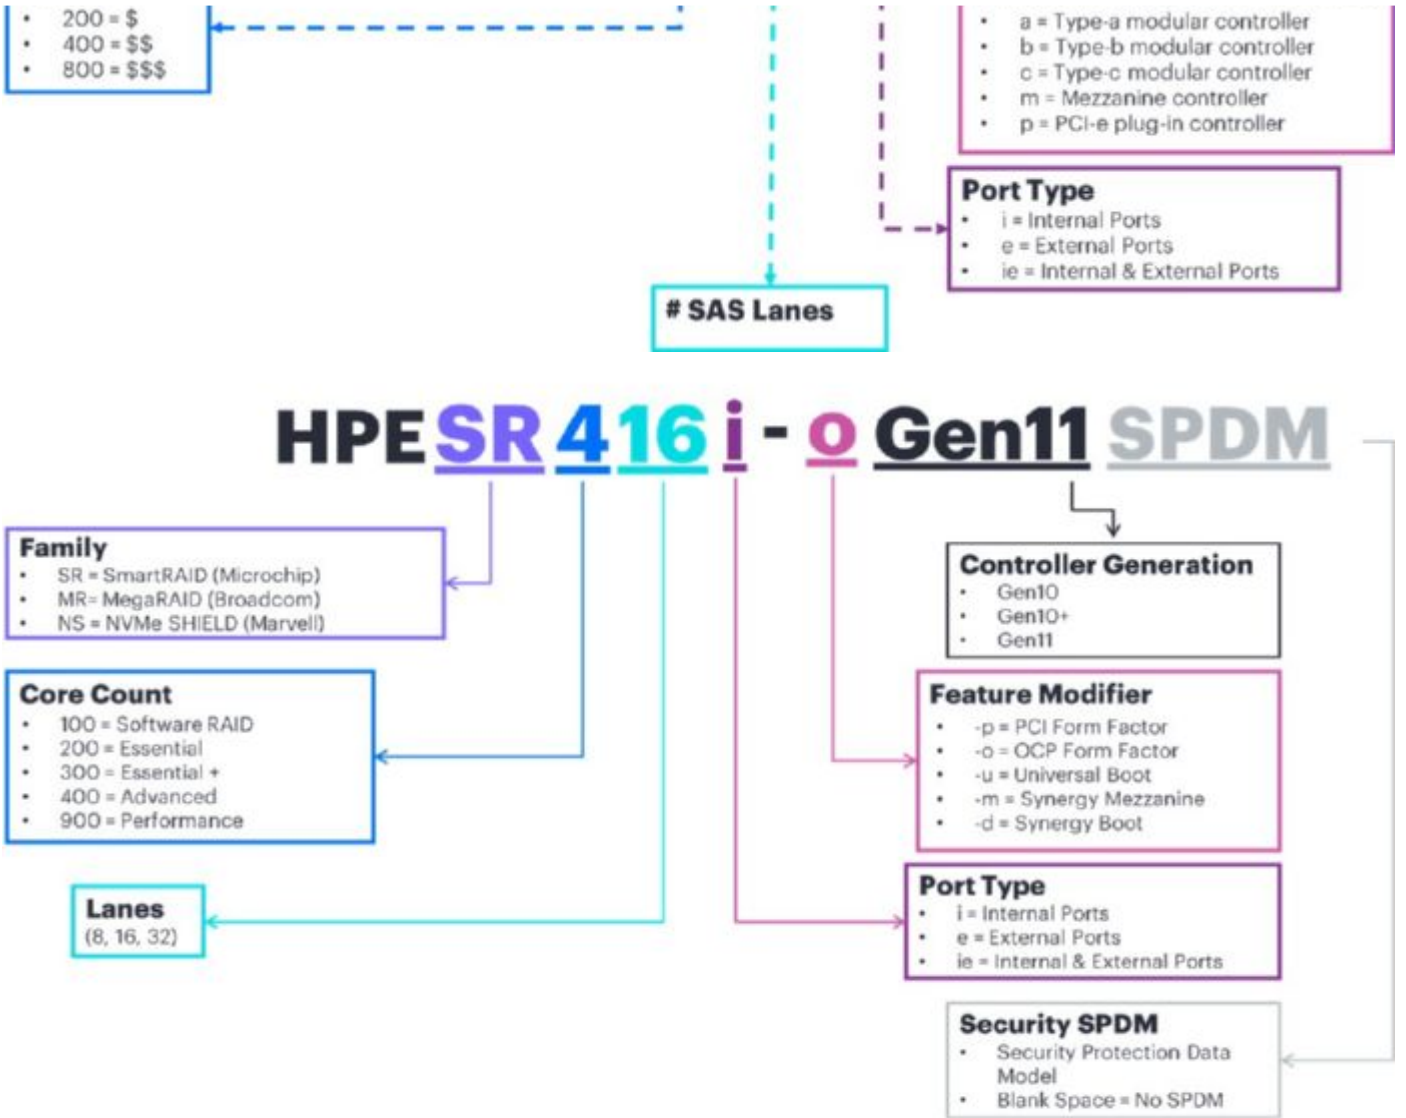
Memory Blank Kit

Configuration Information

HPE DDR4 DIMM Blank Kit	P07818-B21
Notes: Memory DIMM blanks must be installed in each empty slot.	
Choose backplane /drive cage	
HPE ProLiant Compute DL320 Gen12 SFF Configure-to-order Server	P71437-B21
Supported Drive Cages	
HPE ProLiant Compute DL320 Gen12 SP 8SFF x4 NVMe U.2 Backplane Kit	P71421-B21
HPE ProLiant Compute DL3XX Gen12 1U 8SFF x1 Tri-Mode U.3 L-Shaped Backplane Kit	P75084-B21
HPE ProLiant Compute DL320 Gen12 8SFF x4 NVMe U.3 Backplane Kit	P75085-B21
HPE ProLiant Compute DL3XX Gen12 1U 2SFF x4 Tri-Mode U.3 Side-by-Side Backplane Kit	P75086-B21
HPE ProLiant Compute DL320 Gen12 2SFF x4 NVMe U.2 BC Backplane Kit	P75087-B21
Notes: – Direct Attach NVMe drive capability depends on PCIe lane availability. – SATA SFF drives supported only with appropriate controller.	
HPE ProLiant Compute DL320 Gen12 SFF/EDSFF Configure-to-order Server	P75217-B21
Supported Drive Cages	
HPE ProLiant Compute DL3XX Gen12 1U 4EDSFF NVMe Stacking Backplane Kit	P72221-B21
HPE ProLiant Compute DL3XX Gen12 1U 2SFF x4 Tri-Mode U.3 Stacking Backplane Kit	P72223-B21
Notes: – Direct Attach NVMe drive capability depends on PCIe lane availability. – SATA SFF drives supported only with appropriate controller.	
HPE ProLiant Compute DL320 Gen12 GPU Configure-to-order Server	P75220-B21
Supported Drive Cages	
HPE ProLiant Compute DL3XX Gen12 1U 4EDSFF NVMe Stacking Backplane Kit	P72221-B21
HPE ProLiant Compute DL3XX Gen12 1U 2SFF x4 Tri-Mode U.3 Stacking Backplane Kit	P72223-B21
Notes: – GPU Server requires Rich I/O CPU to support sufficient PCIe lanes for PCIe slots and drive cages. – SATA SFF drives supported only with appropriate controller.	
Choose Risers	
Please select one or more from below.	
HPE ProLiant Compute DL3X0 Gen12 x16 PCIe Primary Riser Kit	P71430-B21
HPE ProLiant Compute DL320 Gen12 SP x16 PCIe Secondary Riser Kit	P72152-B21
HPE ProLiant Compute DL320 Gen12 x16 Low Profile NS204i-t Boot Controller Riser Kit	P77555-B21
Notes: P77555-B21 required for rear hot plug NS204i support with P67252-B21 2400W 73.5mm PSU.	

Choose Storage Controller
Please select one or more from below.

Configuration Information



Notes: For more information on the HPE Gen11 Storage Controller, please refer to the following: HPE Compute MR Gen11 Controllers QuickSpecs

Essential RAID Controllers	
HPE MR216i-p Gen11 x16 Lanes without Cache PCI SPDM Plug-in Storage Controller	P47785-B21
HPE MR216i-o Gen11 x16 Lanes without Cache OCP SPDM Storage Controller	P47789-B21
Performance RAID Controllers	
HPE MR408i-o Gen11 x8 Lanes 4GB Cache OCP SPDM Storage Controller	P58335-B21
HPE MR416i-o Gen11 x16 Lanes 8GB Cache OCP SPDM Storage Controller	P47781-B21
HPE MR416i-p Gen11 x16 Lanes 8GB Cache PCI SPDM Plug-in Storage Controller	P47777-B21

Notes:
– All Performance RAID Controllers require Li-ion battery or Smart Capacitor option (below).
– GPU Server requires Rich I/O CPU to support sufficient PCIe lanes for PCIe slots and drive cages.
– All HPE MRxxx RAID controllers support SAS, SATA, and NVMe drives.

Battery and Hybrid Capacitor	
HPE Smart Storage Hybrid Capacitor with 145mm Cable Kit	P02377-B21
HPE 96W Smart Storage Lithium-ion Battery with 145mm Cable Kit	P01366-B21

Configuration Information

Notes: If HPE 96W Smart Stg Li-ion Batt 145mm Kit is selected then HPE Smart Hybrid Capacitor 145mm kit cannot be selected and vice versa.

M.2 NVMe OS Boot Device

HPE NS204i-u v2 480GB NVMe Hot Plug Boot Optimized Storage Device	P78279-B21
HPE ProLiant Compute DL320 Gen12 NS204i-u Internal Cable Kit	P76627-B21
HPE ProLiant Compute DL320 Gen12 NS204i-u GPU Internal Cable Kit	P76628-B21
HPE ProLiant Compute DL320 Gen12 NS204i-u Front Cable Kit	P77186-B21
HPE ProLiant Compute DL3XX Gen12 NS204i-u Rear Cable Kit	P71433-B21
HPE ProLiant Compute DL320 Gen12 x16 Low Profile NS204i-t Boot Controller Riser Kit	P77555-B21

Notes: P77555-B21 required for rear hot plug NS204i support with P67252-B21 2400W 73.5mm PSU.

CPU-Based RAID Controller (Intel® VROC)

Intel® Virtual RAID on CPU RAID 1 FIO Software for HPE	S3Q19A
Intel® Virtual RAID on CPU Premium FIO Software for HPE	R7J57A

Notes: VROC supports up to 8 NVMe direct attach drives. SATA drives not supported.

Storage Controller

HPE Smart Array E208e-p SR Gen10 (8 External Lanes/No Cache) 12G SAS PCIe Plug-in Controller	804398-B21

Platform Compatible Cable Kits

Cables are listed by supported CTO model.

Notes:

- PCIe Cable Kits connect to PCIE RAID Controller.
- OROC Cable Kits connect to OCP RAID Controller.
- Direct Attach Cable Kits connect directly to MLB Riser connector.
- MCIO Direct Attach Cable Kits connect to MCIO connectors on MLB.

HPE ProLiant Compute DL320 Gen12 Common Cable Kits

HPE ProLiant Compute DL3X0 Gen12 OCP SlotB for R1S MCIO Cable Kit	P75154-B21
HPE ProLiant Compute DL3X0 Gen12 Direct Attach OCP SlotB MXIO Cable Kit	P77556-B21
HPE ProLiant DL320 Gen11 Intrusion Detection Cable Kit	P55417-B21

HPE ProLiant Compute DL320 Gen12 SFF Configure-to-order Server (P71437-B21)

HPE Networking Options

Select one or more Networking Options.

Notes:

- Direct Attach Cable (DAC) for copper environments or fiber transceivers and cables for fiber-optic environments must be purchased separately. Refer to the related NIC QuickSpecs for Technical Specifications and additional information: https://h20195.www2.hpe.com/v2/getpdf.aspx/A00002507ENW.pdf
- 25 Gb or faster Ethernet adapter requires high performance fan selection.

HPE Networking

PCIe Adapters

1 Gigabit Ethernet adapters	
Broadcom BCM5719 Ethernet 1Gb 4-port BASE-T Adapter for HPE	P51178-B21
10 Gigabit Ethernet adapters	
Broadcom BCM57416 Ethernet 10Gb 2-port BASE-T Adapter for HPE	P26253-B21
Broadcom BCM57412 Ethernet 10Gb 2-port SFP+ Adapter for HPE	P26259-B21
10/25 Gigabit Ethernet adapters	
Broadcom BCM57414 Ethernet 10/25Gb 2-port SFP28 Adapter for HPE	P26262-B21
Broadcom BCM57504 Ethernet 10/25Gb 4-port SFP28 Adapter for HPE	P26264-B21
Intel® E810-XXVDA2 Ethernet 10/25Gb 2-port SFP28 Adapter for HPE	P08443-B21
Intel® E810-XXVDA4 Ethernet 10/25Gb 4-port SFP28 Adapter for HPE	P08458-B21
NVIDIA Ethernet 10/25Gb 2-port SFP28 NVMe-oF Crypto Adapter for HPE	S2A69A

Notes:

- Recommended ambient temperature with high performance fans installed.
- 25 Gb or faster Ethernet adapter requires high performance fan selection.
- If 1 or 2 Single Wide GPUs installed in front, it is advisable to install the GPUs in PCIe slots 4 and 6, with the Ethernet adapter installed in PCIe slot 1.
- If there's 1 Double Wide GPU in front, it is advisable to install the GPU in PCIe slots 5 and 6, with the Ethernet adapter installed in PCIe slot 2.
- *Conditional support, with DAC (direct attach copper) cable only.

100 Gigabit Ethernet adapters

Intel® E810-CQDA2 Ethernet 100Gb 2-port QSFP28 OCP3 Adapter for HPE P22767-B21

Broadcom BCM57608 Ethernet 100Gb 2-port QSFP112 OCP3 Adapter for HPE P73114-B21

Notes:

- Recommended ambient temperature with high performance fans installed.
- 25 Gb or faster Ethernet adapter requires high performance fan selection.
- If 1 or 2 Single Wide GPU is installed in front, it is advisable to install the GPUs in PCIe slots 4 and 6, with the Ethernet adapter installed in OCP slot A.
- If 1 Double Wide GPU is installed in front, it is advisable to install the GPU in PCIe slots 5 and 6, with the Ethernet adapter installed in OCP slot B.

GPU (P75220-B21) with up to 2 Single Wide GPU in front	25 C	Not supported
GPU (P75220-B21) with 2 Double Wide or 4 Single Wide GPUs in the front	25 C	Not supported

HPE InfiniBand

HPE InfiniBand NDR200/Ethernet 200GbE 2-port QSFP112 PCIe5 x16 MCX755106AC-HEAT Adapter P65333-B21

Notes:

- Recommended ambient temperature with high performance fans installed.
- If InfiniBand adapter is selected, high performance fans are required.
- If 1 or 2 Single Wide GPU is installed in front, it is advisable to install the GPUs in PCIe slots 4 and 6, with the InfiniBand adapter installed in PCIe slot 1.
- If 1 Double Wide GPU is installed in front, it is advisable to install the GPU in PCIe slots 5 and 6, with the InfiniBand adapter installed in PCIe slot 2.
- *Conditional support, with DAC (direct attach copper) cable only.

Computational and Graphics Accelerators

NVIDIA L4 24GB PCIe Accelerator for HPE S0K89C

Notes:

- Compatible with GPU CTO Server.
- Requires performance fans to be installed.

NVIDIA L40S 48GB PCIe Accelerator S2L70C

Notes:

- Compatible with GPU CTO Server.
- Requires performance fans to be installed.
- Requires HPE ProLiant Compute DL3XX Gen12 Front GPU L40S Power Cable Kit (P75110-B21)

Power and Cooling

Please select power supplies, fans, and heat sink options below.

Cooling Options

HPE ProLiant Compute Gen12 1U Standard Fan Kit P71954-B21
HPE ProLiant Compute Gen12 1U High Performance Fan Kit P71958-B21
HPE ProLiant Compute DL320 Gen12 1U Closed-loop Liquid Cooling FIO Fan Kit P76603-B21

Configuration Information

Notes:
– Fan Kit Includes one fan, seven (7) required per server.
– High Performance Fans required for processors with a TDP > 185W.
– Closed Loop Liquid Cooling Fans required for processors with a TDP > 270W.

HPE ProLiant DL3X0 Gen11 1U Standard Heat Sink Kit	P48904-B21
HPE ProLiant Compute DL320 Gen12 Performance Heat Sink Kit	P71956-B21
HPE ProLiant Compute DL320 Gen12 1U Closed-loop Liquid Cooling FIO Heat Sink Kit	P76605-B21

Notes:
– High Performance Heat Sink required for processors with a TDP > 185W.
– Closed Loop Liquid Cooling FIO Heat Sink required for processors with a TDP > 270W.

HPE M-CRPS Titanium Hot Plug Power Supply Kits

HPE 1000W M-CRPS Titanium Hot Plug Power Supply Kit	P67240-B21
HPE 1500W M-CRPS Titanium Hot Plug Power Supply Kit	P67244-B21
HPE 2400W M-CRPS Titanium Hot Plug Power Supply Kit	P67252-B21

Notes:
– All power supplies rated for 96% efficiency.
– Mixing power supplies is not supported.
– Power supplies ship without jumper cords.

Step 3: Choose Additional Factory Integratable Options (FIO)

Security Options

HPE Trusted Supply Chain for HPE ProLiant P36394-B21

Notes:

– HPE Trusted Supply Chain is an optional security upgrade intended for agencies and regulated industries needing enhanced security and compliance needs. Applying this option to a CTO server ensures it is built in the USA in a secured facility by vetted HPE personnel assigned to the manufacturing processes. A multitude of checkpoints/inspections for malicious microcode and counterfeit parts are performed throughout the server build, and additional safeguards are put in place against cyber-exploits throughout the server lifecycle. Learn more at http://www.hpe.com/security

– This option requires the selection of HPE DL320 Gen11 Intrusion Cable Kit.

– This option requires the selection of either HPE iLO Advanced 1-server License with 3-year Support on iLO Licensed Features (BD505A) or HPE iLO Advanced 1-server License with 1yr Support on iLO Licensed Features (512485-B21)

– This option is limited to stand-alone CTO servers only. The HPE Trusted Supply Chain configuration will not be available if the server is ordered as factory integrated into a rack

– One instance of the following Electronic License to Use is required per order (not per server):

R6X85AAE (HPE Trusted Supply Chain E-LTU)

This option cannot be selected with TAA instruction SKU or TAA CTO Models

HPE ProLiant Gen11 1U Common Bezel Kit P50450-B21

HPE ProLiant DL320 Gen11 Intrusion Detection Cable Kit P55417-B21

HPE Bezel Lock Kit 875519-B21

Notes: Requires ProLiant Gen11 1U Common Bezel Kit

Factory Configuration Settings

HPE iLO Common Password FIO Setting P08040-B21

Notes:

– Replaces iLO default randomized password with an HPE-defined common password. HPE highly recommends changing this password immediately after the initial onboarding process.

– Customers who want to choose their own custom iLO default password should use the HPE Factory Express Integration Services.

HPE Smart Memory Fast Fault Tolerance FIO Setting 875293-B21

Notes:

– Enables Fast Fault Tolerance mode, an HPE Memory RAS feature introduced in HPE Gen10 servers that survives up to two DRAM failures.

– This RAS feature combines Adaptive Double DRAM Device Correction (ADDC) with HPE Advanced Error Detection Technology, resulting in significantly better memory reliability and availability than what ADDC provides on its own. For more information, see our Memory RAS feature technical whitepaper.

– If 'Memory Fast Fault Tolerance' is selected with Single Rank DIMM, then Min=2 and Max=16 DIMMs are allowed for selection.

– If 'Memory fast fault Tolerance' is selected with Dual Rank DIMM or Quad Rank DIMM, then Min=1 and Max=16 DIMMs are allowed for selection.

HPE ProLiant DL300 Gen10 Plus Platform RAS OS Control FIO Setting P27078-B21

Notes:

– Firmware first is ProLiant servers BIOS default selection. In this mode, monitoring functionality built into the design of the server is first on the scene of correctable problems to determine quickly and accurately what's wrong and how to fix it. Firmware first enables many platform-specific actions for errors, including predictive fault analysis. This technology functions independently of the operating system and does not depend on O/S-based tools.

Additional Options

– This SKU instructs factories to enable O/S first mode, a BIOS switch that allows experienced customers to have the operating system handle correctable hardware errors. More errors could be observed in this mode, including soft ones that do not necessarily indicate issues with the component or cause warranty replacement.

RAID Settings

HPE RAID 0 Drive 1 FIO Setting	339777-B21
HPE RAID 1 Drive 1 FIO Setting	339778-B21
HPE RAID 5 Drive 1 FIO Setting	339779-B21
HPE Raid 5 w/SP Drive 1 FIO Setting	339780-B21
HPE RAID FIO Advanced Data Guarding Option	339781-B21

Notes:

– General RAID rules:

- Smart Array controller must be selected.
- Matching (same part number) drives must be selected.
- One RAID set will be offered and applied to all applicable drives installed in a server.
- RAID must be selected if both Factory Installed OS and Smart Array controller are present.

– RAID level selection is limited by Storage controller selection.

– If RAID is selected in a configuration with VROC and internal controller, then Customer Defined RAID Setting (389692-B21) must be selected.

HPE Customer Defined RAID Setting Service	389692-B21

Notes:

– At least 1 hard drive must be on order.

– Preinstalled OS must be on order.

– A Customer Intent Document (CID) must be supplied if this part number is ordered.

– This Customer Intent Document should include all details about the desired RAID custom configuration (This includes Drive part numbers and quantities, RAID levels desired, which drives should be applied to each RAID level, and if a preinstalled OS has been ordered - which RAID set it should be installed on).

Optical Drives and Enablement Kits

HPE Mobile USB DVD-RW Optical Drive	701498-B21
HPE 9.5mm SATA DVD-ROM Optical Drive	726536-B21
HPE 9.5mm SATA DVD-RW Optical Drive	726537-B21

Notes:

– SFF or SFF/EDSFF CTO server requires appropriate Optical Drive Enablement Kit.

– 4LFF CTO Server does not require enablement kit.

– Optical Drive not supported with 12LFF or GPU CTO Server.

HPE ProLiant Compute DL3XX Gen12 1U SFF/EDSFF Hybrid Display Port/USB/Optical Drive Enablement Kit	P72227-B21

Notes: Supported only with SFF/EDSFF CTO Server

HPE ProLiant Compute DL3XX Gen12 1U 8SFF Front Display Port/USB/Optical Drive Enablement Kit	P72225-B21

Notes: Supported only with SFF CTO Server

HPE ProLiant Compute DL3XX Gen12 1U 4LFF Front Display Port/USB Enablement Kit	P72229-B21

Notes: Supported only with 4LFF CTO Server

HPE Converged Infrastructure Management Software

- To learn more, please visit the HPE Uninterruptible Power Systems (UPS) web page.
- Refer to the HPE Direct Flow Three Phase Uninterruptible Power System QuickSpecs for information on these products and their specifications.
- Refer to the HPE Line Interactive Single-Phase UPS QuickSpecs for information on these products and their specifications.

HPE Rack Options

Refer to the HPE KVM Switches web page for information on these products and their specifications

Easy Install Rail Kits

Easy Install rail kits contain telescoping rails, which allow for in-rack serviceability.

To assist in installing the server into the rack, an optional installation tool is available by contacting your local services representative.

Notes:

- Hewlett Packard Enterprise recommends that a minimum of two people are required for all Rack Server installations. Please refer to your installation instructions for proper tools and the number of people to use for any installation.
- HPE rail kits are designed to work with HPE racks in compliance with industry standard EIA-310-E. In the event a customer elects to purchase a third-party rack for use with an HPE rail kit, any such use is at customer's own risk. HPE makes no express or implied warranties with respect to such third-party racks and specifically disclaims any implied warranties of merchantability and fitness for a particular purpose. Furthermore, HPE has no obligation and assumes no liability for the materials, design, specifications, installation, safety, and compatibility of any such third-party racks with any rail kits, including HPE rail kits.

HPE ProLiant DL300 Gen10 Plus 1U Cable Management Arm for Rail Kit P26489-B21

Notes: Not supported with 12LFF CTO Server

HPE Easy Install Rail 1 Kit P52349-B21

Notes: Supported only with 8SFF CTO Server.

Additional Options

HPE DL3XX Gen11 Easy Install Rail 2 Kit	P52351-B21
Notes: – Supported with 4LFF CTO Server. – Supported with SFF/EDSFF CTO Server.	
HPE Easy Install Rail 9 Kit	P52353-B21
Notes: Supported only with 12LFF CTO Server.

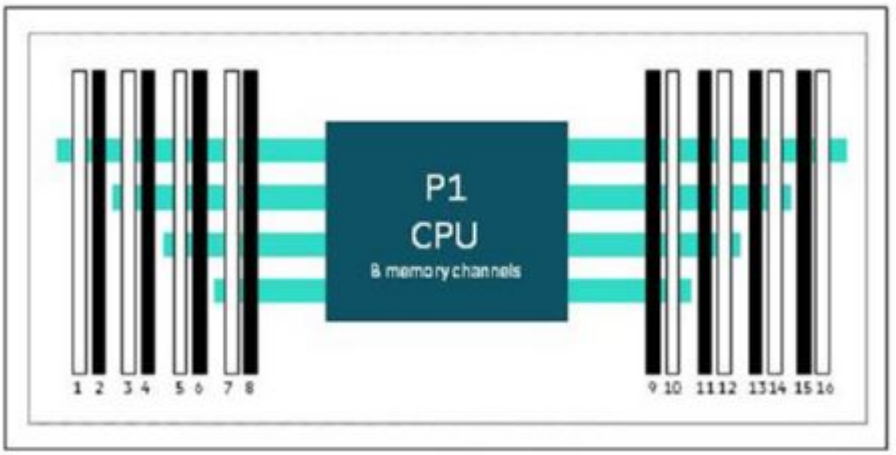
Memory Population guidelines



HPE ProLiant DL320 Gen12

DIMM population order																
DIMM slot	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16
1 DIMM										10						
2 DIMMs							7			10						
4 DIMMs[1,2,3]			3				7			10				14		
8 DIMMs[1,2,3,4]	1		3		5		7			10		12		14		16
16 DIMMs[1,2,3,4]	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16

HPE ProLiant Gen12 with Intel® Xeon 6® Performance Core (P-Core) processors																
DIMM population order																
DIMM slot	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16
1 DIMM										10						
2 DIMMs							7			10						
4 DIMMs[1,2,3,5,6]			3				7			10						
8 DIMMs[1,2,3,4,5,6]	1		3		5		7			10		12		14		16
16 DIMMs[1,2,3,4,5,6]	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16

Memory

Notes:
– Cells without entries represent configurations not supported, and if populated, the server may result in non-optimal memory performance or other unexpected behavior.
– [1] Supports Hemi (hemisphere mode, HCC Only).
– [2] Supports Software Guard Extensions (SGX).
– [3]Supports Interleaving
– [4]Supports Mirroring
– [5]Supports Sub-NUMA clustering (SNC2, XCC Only)
– [6]Supports Quad-Channel Configuration (XCC Only)

General Memory Population Rules and Guidelines:
– Install DIMMs only after the corresponding processor is installed.
– All DIMMs must be DDR5
– x4 and x8 DIMMs can be mixed in the same channel
– Mixing of non-3DS and 3DS LRDIMMs is not allowed on the same channel
– The maximum memory speed is a function of the memory type, memory configuration, and processor model.
– The maximum memory capacity is a function of the number of DIMM slots on the platform, the largest DIMM capacity
– qualified on the platform, the number and model of installed processors qualified on the platform.
– To realize the performance memory capabilities listed in this document, HPE DDR5 Smart Memory is required.
– Use of 256GB DIMMs requires high-performance fans.
For additional information, please reference the HPE DDR5 Smart Memory QuickSpecs
Notes: The maximum memory speed is a function of the memory type, memory configuration, and processor model.
For details on the HPE Server Memory speed, visit: https://www.hpe.com/docs/server-memory

Notes: 12 LFF CTO Server requires 1200mm depth rack for proper mounting.

Weight (approximate)

– SFF light load

- 11.5 kg (25.35 lb): One Drive, one DIMM, one PCIe card, one riser, one DC-SCM module, one processor, one heatsink, one power supply, seven fans.

– SFF maximum

- 17.25 kg (38.0 lb): Ten drives, sixteen DIMMs, two OCP cards, two PCIe risers, two PCIe cards, one DC-SCM module, one processor, one heatsink, two power supplies, and seven fans.

– SFF/EDSFF light load

- 11.6 kg (25.57 lb): One Drive, one DIMM, one PCIe card, one riser, one DC-SCM module, one processor, one heatsink, one power supply, seven fans.

– SFF/EDSFF maximum

- 18.71 kg (41.25 lb): Twenty drives, sixteen DIMMs, two OCP cards, two PCIe risers, two PCIe cards, one DC-SCM module, one processor, one heatsink, two power supplies, and seven fans.

– 4 LFF light load

- 12.5 kg (27.15 lb): One Drive, one DIMM, one PCIe card, one riser, one DC-SCM module, one processor, one heatsink, one power supply, seven fans.

– 4 LFF maximum

- 18.34 kg (40.35 lb): Four drives, sixteen DIMMs, two OCP cards, two PCIe risers, two PCIe cards, one DC-SCM module, one processor, one heatsink, two power supplies, optical drive, and seven fans.

– 12 LFF light load

- 17.6 kg (38.8 lb): One Drive, one DIMM, one PCIe card, one riser, one DC-SCM module, one processor, one heatsink, one power supply, seven fans.

– 12 LFF maximum

- 28.93 kg (63.65 lb): Twelve drives, sixteen DIMMs, two OCP cards, two PCIe risers, two PCIe cards, one DC-SCM module, one processor, one heatsink, two power supplies, optical drive, and seven fans.

– GPU light load

- 15.5 kg (34.17 lb): One Drive, one DIMM, two single width GPUs, one PCIe card, one riser, one DC-SCM module, one processor, one heatsink, one power supply, seven fans.

– GPU Dense maximum

- 21.53 kg (47.47 lb): Eight drives, sixteen DIMMs, two double width GPUs, two PCIe cards, two risers, two OCP cards, one DC-SCM module, one processor, one heatsink, two power supplies, seven fans.

Input Requirements (per power supply)

Rated Line Voltage
- Low-line input voltage: 100 VAC to 120 VAC
- High-line input voltage: 200 VAC to 240 VAC
- 240 VDC for China

BTU Rating

Maximum
- For 2400W M-CRPS Power Supply: 4268 (at 100 VAC), 8532 (at 240 VAC)
- For 1500W M-CRPS Power Supply: 3792 (at 100 VAC), 5560 (at 200 VAC)
- For 1000W M-CRPS Power Supply: 3044 (at 100 VAC), 3680 (at 200 VAC)

Power Supply Output (per power supply)

Rated Steady-State Power
- For 2400W M-CRPS Power Supply: 1200W: (at 100-127 VAC), 2400W (at 200-240 VAC), 2400W (at 240 VDC) input for China only
- For 1500W M-CRPS Power Supply: 1000W: (at 100 VAC), 1100W (at 110-120VAC), 1500W (at 200-240 VAC), 1500W (at 240 VDC) input for China only
- For 1000W M-CRPS Power Supply: 800W: (at 100-120 VAC), 1000W (at 200-240 VAC), 1000W (at 240 VDC) input for China only

Maximum Peak Power
- For 2400W M-CRPS Power Supply: 2400W (at 100 to 127 VAC), 2400W (at 200 to 240 VAC), 2400W (at 240 VDC) input for China only
- For 1500W M-CRPS Power Supply: 1000W: (at 100 VAC), 1100W (at 110-120VAC), 1500W (at 200-240 VAC), 1500W (at 240 VDC) input for China only
- For 1000W M-CRPS Power Supply: 800W: (at 100-120 VAC), 1000W (at 200-240 VAC), 1000W (at 240 VDC) input for China only

For more information on power specifications and technical content, reference the HPE M-CRPS QuickSpecs.

System Inlet Temperature

- Standard Operating Support

10° to 35°C (50° to 95°F) at sea level with an altitude derating of 1.0°C per every 305 m (1.8°F per every 1000 ft) above sea level to a maximum of 3050 m (10,000 ft), no direct sustained sunlight. The maximum rate of change is 20°C/hr (36°F/hr). The upper limit and rate of change may be limited by the type and number of options installed.

System performance during standard operating support may be reduced if operating with a fan fault or above 30°C (86°F).

- Extended Ambient Operating Support

For approved hardware configurations, the supported system inlet range is extended to be: 5° to 10°C (41° to 50°F) and 35° to 40°C (95° to 104°F) at sea level with an altitude derating of 1.0°C per every 175 m (1.8°F per every 574 ft)

above 900 m (2953 ft) to a maximum of 3050 m (10,000 ft). The approved hardware configurations for this system are listed at Support ASHRAEGen12

For approved hardware configurations, the supported system inlet range is extended to be: 40°C to 45°C (104°F to 113°F) at sea level with an altitude derating of 1.0°C per every 125 m (1.8°F per every 410 ft) above 900 m (2953 ft) to a maximum of 3050 m (10,000 ft). The approved hardware configurations for this system are listed at Support ASHRAEGen12

System performance may be reduced if operating in the extended ambient operating range or with a fan fault.

– Non-operating

-30° to 60°C (-22° to 140°F). The maximum rate of change is 20°C/hr (36°F/hr).

Relative humidity (non-condensing)

– Operating

8% to 90% - Relative humidity (Rh), 28°C (82.4°F) maximum wet bulb temperature, non-condensing.

– Non-operating

5 to 95% relative humidity (Rh), 38.7°C (101.7°F) maximum wet bulb temperature, non-condensing.

Altitude

– Operating

3050 m (10,000 ft). This value may be limited by the type and number of options installed. The maximum allowable altitude change rate is 457 m/min (1500 ft/min).

– Non-operating

9144 m (30,000 ft). The maximum allowable altitude change rate is 457 m/min (1500 ft/min).

Emissions Classification (EMC)

To view the regulatory information for your product, view the Safety and Compliance Information for Server, Storage, Power, Networking, and Rack Products, available at the Hewlett Packard Enterprise Support Center:

https://www.hpe.com/support/Safety-Compliance-EnterpriseProducts

Acoustic Noise

Listed are the declared mean A-Weighted sound power levels (LWA,m), declared average bystander position A-Weighted sound pressure levels (LpAm) and the statistical adder for verification, Kv, is a quantity to be added to the declared mean A-weighted sound power level, LWA,m when the product is operating in a 23 ± 2°C ambient environment. Noise emissions were measured in accordance with ISO 7779 (ECMA 74) and declared in accordance with ISO 9296 (ECMA 109). The listed sound levels apply to standard shipping configurations. Additional options may result in increased sound levels. Please have your HPE representative provide information from the HPE EMESC website for further technical details regarding the configurations listed below.

Technical Specifications

Test case	Entry 1 4LFF	Entry 2 SFF	Mid Range SFF	Performance SFF
Idle				
$L_{WA,m}$	4.9 B	5.1 B	5.0 B	5.0 B
LpAm	35 dBA	37 dBA	37 dBA	37 dBA
Kv	0.4 B	0.4 B	0.4 B	0.4 B
Operating				
$L_{WA,m}$	5.9 B	6.1 B	6.2 B	5.0 B
LpAm	44 dBA	45 dBA	48 dBA	37 dBA
Kv	0.4 B	0.4 B	0.4 B	0.4 B

Notes:

– All measurements made to conform to ISO 7779 / ECMA-74 and declared to conform to ISO 9296 / ECMA-109. Operating mode is represented by 50% of CPU.

– The results in this declaration apply only to the specific configuration listed below when operating and tested according to the indicated modes and standards. A system with additional configuration components or increased operating functionality may increase the noise emission values.

- Entry-4LFF Configuration: 1x Xeon® 6505P CPU, 3x SATA 7.2K LFF HDD, 1x 16GB DIMM, 1x 1000W PSU, 7x STD Fan, 1x MR408i-o OCP.
- Entry-SFF Configuration: 1x Xeon® 6505P CPU, 1x SAS 10K SFF BC HDD, 1x 16GB DIMM, 1x 1000W PSU, 7x STD Fan, 1x MR408i-o OCP.
- Medium Configuration: 1x Xeon® 6515P CPU, 8x SAS RI SFF BC VS MV SSD, 2x 32GB DIMM, 1x 1000W PSU, 7x STD Fan, 1x MR408i-o OCP, 1x 10/25G PCIe.
- Performance Configuration: 1x Xeon® 6710E CPU, 8x NVMe RI BC U.3 SSD, 4x 32GB DIMM, 1x 1000W PSU, 7x Perf Fan, 1x 10GbE 2p OCP, 1x 10/25G PCIe.

– The declared mean A-weighted sound power level, LWA,m, is computed as the arithmetic average of the measured.

– A-weighted sound power levels for a randomly selected sample, rounded to the nearest 0,1 B.

– The declared mean A-weighted emission sound pressure level, LpA,m, is computed as the arithmetic average of the measured A-weighted emission sound pressure levels at the bystander positions for a randomly selected sample, rounded to the nearest 1 dB.

– The statistical adder for verification, Kv, is a quantity to be added to the declared mean A-weighted sound power level, LWA,m, such that there will be a 95% probability of acceptance, when using the verification procedures of ISO 9296, if no more than 6,5 % of the batch of new equipment, has A-weighted sound power levels greater than (LWA,m + Kv).

– The quantity, LWA,c (formerly called LWAd), can be computed from the sum of LWA,m and Kv.

– B, dB, abbreviations for bels and decibels, respectively, where 1 B = 10 dB.

– Systems under abnormal conditions may increase the noise level, people in the vicinity of the product [cabinet] for extended periods of time should consider wearing hearing protection or using other means to reduce noise exposure.

Environmentally friendly Products and Approach End-of-life Management and Recycling

Hewlett Packard Enterprise offers end-of-life product return, trade-in, and recycling programs, in many geographic areas, for our products. Products returned to Hewlett Packard Enterprise will be recycled, recovered, or disposed of in a responsible manner.

The EU WEEE directive (2002/95/EC) requires manufacturers to provide treatment information for each product type used by treatment facilities. This information (product disassembly instructions) is posted on the Hewlett Packard Enterprise website. These instructions may be used by recyclers and other WEEE treatment facilities, as well as Hewlett Packard Enterprise OEM customers who integrate and re-sell Hewlett Packard Enterprise equipment.

Summary of Changes

Date	Version History	Action	Description of Change
01-Dec-2025	Version 11	Changed	Configuration Information section was updated.
		Removed	Read Intensive - NVMe - SFF and HPE InfiniBand obsolete SKUs.
03-Nov-2025	Version 10	Changed	Memory section was updated. Memory population guide matrix was created.
04-Aug-2025	Version 9	Changed	Standard Features and Core Options sections were updated.
		Added	NVIDIA Ethernet Adapters, EU Lot9 regulations.
		Removed	Intel® Xeon 6® Socket Scalable (4S, 8S) SKUs.
07-Jul-2025	Version 8	Changed	Summary of Changes section was updated. Added: Version History URLs.
16-Jun-2025	Version 7	Changed	QuickSpecs survey URL was updated.
11-Jun-2025	Version 6	Changed	Core Options section was updated.
02-Jun-2025	Version 5	Changed	Core Options section was updated. Added: Intel® Xeon 6® Socket Scalable (4S, 8S) SKUs.
05-May-2025	Version 4	Changed	Additional Options section was updated. Added: Software as a Service Management Enablement SKU (COM), European Union ErP Lot 9 Regulation section to include Turkey and Ireland.
14-Apr-2025	Version 3	Changed	Core Options section was updated. Removed: Cable Kit SKU.
24-Mar-2025	Version 2	Changed	Core Options section was updated. Added: 2SFF MCIO Direct Attach Cable Kit SKU and QuickSpecs Survey.
24-Feb-2025	Version 1	New	New QuickSpecs.
