

- **11 blade design with enhanced bearing technology**
- **Special fan blades designed for maximum airflow, low noise & perfect illumination**
- **16 addressable LEDs (16.8 million colors) offering complex RGB lighting**

With the **AF-12RGB**, **CHIEFTEC** delivers a brand new RGB LED fan that convinces all along the line. The fan is equipped with 16 addressable LEDs and allows an almost infinite RGB effect variety, which is not possible with a conventional +12V RGB lighting. In addition, each fan is decoupled and designed for whisper-quiet operation due to the special design of the 11 fan blades. The white finish of the fan blades ensure uniform illumination. In combination with our *DF-908 control board, all conventional **+5V addressable RGB motherboard technologies such as ASUS™ AURA, ASRock™ RGB Sync, MSI™ Mystic Light Sync and Gigabyte™ RGB FUSION** are supported.

Guaranteed-compatible only with **CHIEFTEC/CHIEFTRONIC** control units (DF-906, DF-908).
