- o Handsfree function
- o Answering machine with a recording time of up to 25 minutes
- o Keyboard and display illumination
- o Phonebook for up to 100 contacts
- o Function key for quick access to flash, mute, silent or redial function
- o Hearing aid compatible
- o ECO DECT

### **Call protection with call block key**

The Gigaset PURE 300A offers a dedicated call block key that allows you to easily place up to 100 phone numbers on a block list to block unwanted calls. Whether it's telemarketing, spam or inappropriate callers, the call block button puts you in control of your calls and protects your privacy.

### **Hands-free function**

With the hands-free function of the Gigaset PURE 300A, you have your hands free to move around or take notes during the call. Thanks to the illuminated speakerphone key, you can activate the function quickly and easily. In addition, the phone's ringtone is output via the speaker, so you'll no longer miss a call even in noisy environments.

### **Backlit display**

With the 1.8" backlit display, you can easily identify phone numbers and names, and read important information such as battery charge indicator, date, time and call duration indicator at a glance. The display is bright enough to be easily read in darker rooms, while the soft illumination is easy on your eyes and enhances the user experience.

### **Phonebook**

The phonebook, with space for up to 100 contacts, is a convenient way to access the phone numbers of your friends, family or business associates. At the same time, storing contacts allows the caller's name to be displayed along with the phone number before the call is answered.

### **Answering machine**

With the answering machine from the Gigaset PURE 300A, you'll never miss an important call again. The large memory with a recording length of up to 25 minutes allows you to record messages from family, friends or customers and listen to them later. The messages can be listened to conveniently on the handset or on the base station.
